

CTM Release Notes 7.6.6

1	CTM RELEASE NOTES 7.6.6	3
1.1	KNOWN BUGS CORRECTED AND SUPPORT CASES UPDATED.....	3

1 CTM Release notes 7.6.6

This document describes the version 7.6.6 of CTM.

None of the current features or changes in this release have any impact on the pre-existing functionality if not mentioned explicitly in these release notes, any training may thus be done post-release, if desired.

Please note that the version 7.6.6 of CTM is a release in which stabilization and optimization of the system have been prioritized and we have looked to increase the usability and make the overall performance of CTM better, so that in the future we would be able to deliver more new features that add utility to CTM.

1.1 *Known bugs corrected and support cases updated*

In total almost 40 different bugs have been corrected which solve problems encountered by different contracting authorities and also supplier companies. Some of these corrections fix outright errors, while others improve the day to day usage of the system. For the eTenders platform in Ireland, please see the below list that shows some of the issues resolved in the version 7.6.6 of CTM.

Support case	No	Description
1619 45378 165149	13451	Incorrect supplier response progress bar percentage in case of multiple lots corrected
29119 118049	31524	Resolved an issue with authority side users with viewer permissions not being able to access internal tender documents
93324 111789 149410	38997	Word wrap now correctly works on the print preview page for Questions and Answers
163324	47873	Resolved an issue in TED contract award notice forms which caused awarded supplier information to sometimes not to be prefilled into section V.5.3) Name and address of the contractor
167426	48277	Audit trail print view is correctly displayed if one specific company is selected on the audit trail page
