Issue: 1	9301 – Qualification System for Professional Services	Date: January 2026

Question No	Question	Query date	Response
1	We kindly request confirmation as to whether it would be permissible to submit the documentation for the prequalification phase after the deadline of 12/02/2026 ("3.4 PROPOSED TIMESCALE AND ANTICIPATED PROGRAMME-FIRST RETURN OF COMPLETED PQQs").	13/01/2026	The Qualification System (QS) remains open to new applicants for the duration of the QS. Therefore, you may submit your application even after the stated deadline. However, should a requirement arise, only applicants who are already appointed to the QS at that time will be invited.
2	We would like to confirm whether, once a company has been individually prequalified and is eligible to participate in a "Call-Off", it may form a consortium with other companies that are prequalified under the Qualification System and/or with companies that did not participate in the prequalification phase.	13/01/2026	Flexibility can be provided at the call-off tender stage to allow suppliers to partner with other suppliers. However, any change in status would require a new PQQ submission and reassessment by IE.
3	We would like to confirm whether the project value indicated in the references required under "TECHNICAL/PROFESSIONAL ABILITY" refers to the total CAPEX or construction cost of the project, rather than the contract value of the applicant consultant.	13/01/2026	The value indicated relates to the total CAPEX of the project. Not all projects involve construction.
4	Considering the breadth of the Lots and the associated Areas of Expertise over the 5 year duration of the QS, will Irish Rail allow Candidates to partner for a particular award stage if those candidates have all prequalified for the relevant Lot and Area of Expertise? If this is not allowed, are the teams, either Consortia or Prime and Sub relationships not allowed to be changed post the PQQ process?	13/01/2026	Flexibility can be provided at the call-off tender stage to allow suppliers to partner with other suppliers. However, any change in status would require a new PQQ submission and reassessment by IE.
5	Can teams be supplemented by the addition of Sub Consultants during the award stage if they satisfy the PQQ requirements for a Sub-Consultant?	13/01/2026	Flexibility can be provided at the call-off tender stage to allow suppliers to partner with other suppliers. However, any change in status would require a new PQQ submission and reassessment by IE.
6	The minimum revenue requirements in Part 2 of the questionnaire appear excessive. Can you please consider reducing these requirements to reflect the nature of the works? We would suggest a requirement of €3m for Lot 3 tenderers.	13/01/2026	IE has carefully considered this matter and confirms that the minimum revenue requirements will remain unchanged. These requirements have been determined as proportionate and appropriate, having regard to the scale, complexity, and risk profile of the services to be delivered

Issue: 1	9301 – Qualification System for Professional Services	Date: January 2026

			under Lot 3, and are intended to ensure that tenderers have the necessary financial capacity to perform the contract.
7	Can you please confirm whether there is flexibility for companies to team only on specific areas of expertise? E.g. can two companies join together for some areas of expertise, and tender alone for others?	13/01/2026	Flexibility can be provided at the call-off tender stage to allow suppliers to partner with other suppliers. However, any change in status would require a new PQQ submission and reassessment by IE.
8	Is it acceptable for a QS and PM consultant to complete the PQQ or do we have to be part of an Architectural Led Team (as per page 6 point 2 Architectural Design Services)	13/01/2026	A QS and PM consultant may complete and submit the PQQ provided that the applicant independently satisfies all the minimum requirements set out in the PQQ, including the required minimum turnover, and the required level of relevant experience in line with the scope of services.
9	We note from the table (in Part 1/ pages 5-11 of the PQQ) that each “Area of Expertise” has a number of professional services’ sub-requirements listed (by bullet) under the “Brief Description” column . Can IE confirm if there’s an expectation (or requirement) that an applicant applying for/ appointed to the QS (i.e. Candidates) for a specific Area of Expertise, would have the ability to provide all of the professional service listed under each Area of Expertise or if it would be acceptable that applicants would provide just some of these professional services listed (for the relevant Area of Expertise) being submitted for?	13/01/2026	IE can confirm that it is not expected nor required that an applicant has experience across all of the bullet point services listed under the area of expertise. The bullet points are intended to be indicative of the range of services that may be required within each Area of Expertise. Applicants are expected to demonstrate the required level of relevant experience within the overall Area of Expertise, showing experience in some of the listed professional services, rather than all of them. Accordingly, applications will be assessed on the basis of the applicant’s ability to demonstrate appropriate and relevant experience that, taken as a whole, aligns with the Area of Expertise being applied for.
10	We note in section 5.3 of the PQQ that you have stated that “Project reference provided must have been finalized. On going projects reference will not be acceptable and will be deemed unacceptable”. Can IE please confirm if this refers to client engagements (i.e. a discrete piece of work/ services relating to a project/ scheme) which must have been finalised or if this relates to projects/ schemes (which must have been finalised/	13/01/2026	IE confirms that the requirement in Section 5.3 of the PQQ relates to the completion of the relevant client engagement and project phase, rather than the overall completion of the entire project or scheme. It is acceptable for applicants to use a project reference where subsequent phases of the project or scheme are still ongoing, provided

	completed)? For example if an applicant had provided relevant professional services to a client on a specific project/ scheme which is still in planning/ procurement/ construction, etc., would this mean that any client engagement experience relating to that project/ scheme could not be used? If this was the case, it would seem overly onerous/ exclusionary given the applicants would have completed their client engagements (and demonstrated relevant experience) despite the ongoing nature of the project/ scheme which can take years/ decades to complete and finalise.		that the phase and associated activities used as evidence are fully complete and fall within the stipulated 10-year timeframe.
11	Could the CA please confirm if PQQ's must be submitted by the 12th February or that PQQ's can be submitted at any time between 12th February 2026 and 1st March 2030	13/01/2026	The Qualification System (QS) remains open to new applicants for the duration of the QS. Therefore, you may submit your application even after the stated deadline. However, should a requirement arise, only applicants who are already appointed to the QS at that time will be invited.
12	Can you please advise the estimated total value of works awarded under each lot over the period of the Qualification System?	13/01/2026	At this stage, it is not possible to provide an estimated total value of works to be awarded under each Lot over the period of the Qualification System, as the nature, scale, and timing of future requirements are not yet known. However, call-off competitions will be issued in accordance with the Lot structure and associated value thresholds. Requirements with an estimated value below €1m will be competed among tenderers approved under Lot 1, while requirements with an estimated value exceeding €10m will be competed among tenderers approved under Lot 3.
13	Can you please advise where work will be delivered from, in Client premisses (Irish Rail offices) or from remote location?	13/01/2026	This will depend on the nature of each individual requirement and the relevant Lot. As such, it is not possible to provide a definitive answer at this stage.

Issue: 1	9301 – Qualification System for Professional Services	Date: January 2026

14	Can you please advise if there is a limit on the number of suppliers per lot?	13/01/2026	No, there is no limit on the number of tenderers per lot.
15	Can you please advise how opportunities will be packaged and advertised. For example... if an opportunity needs capabilities from say 4 categories, but a party has only qualified for 2 of those categories, would it be advertised so all parties can see it and therefore look to form a team with another party from the framework in order to jointly meet the requirements of the opportunity? Or would only parties who qualified across all those required categories see the opportunity and be able to respond?	13/01/2026	As set out in the PQQ document, where a requirement requires professional services across multiple <i>Areas of Expertise</i> , IÉ reserves the right to select applicants approved in one or more of the applicable areas.
