

Clarification regarding Personnel and Skills requirement issued 30/04/26

The requirement for access to the minimum required skillset and number of personnel as set out in Section 2.15 Personnel and Skills of the Request for Tender has not changed. The clarification issued on 28/04/26 simply elaborated on the experience requirement for the legal advisor which is set out below again.

The requirement for a Legal Advisor with Procurement Specialism role must be fulfilled by a person with relevant experience who may be either a practising solicitor or an independent legal consultant with appropriate procurement law expertise.

Tenderers are reminded that they may rely on the resources of other entities, provided that these resources are fully described and that the tenderer can demonstrate that they will be available when required.

Please include an organisation chart in your response, clearly identifying all relevant departments, divisions, and 3rd parties, if applicable.
