

Question and Answer document

DPS for the Provision of Managed ICT Security Services

Questions in Total: 3

Question 1

Regarding the wording of "equivalent" on each Lot, can you define what this means?

Answer 1

For the purposes of this DPS platform equivalence requires full compatibility and interoperability including the following:

- any API calls;
- any CLI commands;
- any integrations to third party interfaces;
- any interfaces to reporting solutions;
- any interfaces offered to any other services to at least the same extent as the platform named;
- any services to connect to cloud or on premise infrastructure;
- any network firewall rules;
- format, structure and layout of any data exportable;
- format, structure and layout of any data importable

Question 2

Is it possible for a supplier to bid with the same technology across multiple lots if we meet the requirements of "or equivalent"?

Answer 2

See Answer 1.

Question 3

If a solution is only available as an on-premise solution or only as a SaaS solution, does equivalency mean an on-premise solution for on premise solution and a SaaS solution for a SaaS solution?

Answer 3

See answer 1
