ANNABELLA DIVISIONAL OFFICE MALLOW
Roof Replacement, General Upgrade Works & Condition Survey / Strategic Condition Report
Query Response Document One

Query	Given that the building is a protected structure and the nature of the works proposed, we request that a Conservation Architect with equivalent qualifications and experience to that described in the RFT for Engineer Lead would be better placed and should also be accepted to act as Design Team Lead / Single Service Provider and Employer's Representative, with a suitably qualified Engineer included part of the design team

Response	We have no objection to a Conservation Architect with equivalent qualifications and experience acting as Design Team Lead / Single Service Provider and Employer's Representative. However, suppliers must ensure that a suitably qualified Engineer is part of the Design Team and all requirements for key team members as noted in the tender documents are met.
