## 1. ABOUT THE CONTRACTING AUTHORITY

### 1.1 About the Contracting Authority

Horse Racing Ireland (“HRI”) was established by the Irish Government under the Horse and Greyhound Racing Act 2001. It is a commercial semi-state body that took over the functions previously carried out by the Irish Horse Racing Authority. HRI is responsible for the administration, promotion, and development of Horse Racing in Ireland. HRI subsidiaries include Irish Thoroughbred Marketing Ltd (“ITM”), Tote Ireland and HRI Racecourses Ltd (Leopardstown Racecourse, Leopardstown Golf Centre, Fairyhouse Racecourse, Navan Racecourse & Tipperary Racecourse). Cork Racecourse Mallow and Curragh Racecourse, while not subsidiaries of HRI, are closely affiliated with HRI.

In the first instance it is envisaged that HRI Racecourses will have requirements under the framework. However, this framework will remain open to all other HRI subsidiaries or indeed any other organisations that have a funding, affiliated or governance relationship with HRI. The Contracting Authority reserves the right to use this framework for any other industry body in which it is involved.

### 1.2 The Open Procedure

The Contracting Authority is employing the open procedure to award this Single Party Framework Agreement under the European Union (Award of Public Authority Contracts) Regulations 2016 (Statutory Instrument 284 of 2016) (the “Regulations”). In accordance with the provisions governing the conduct of the open procedure, any interested economic operator may submit a tender in response to this ITT.

In the first instance, the self-declaration form (Appendix 3 – *Form of Self Declaration*) will be reviewed for its completeness. Tenderers meeting this requirement will then be assessed against the award criteria, rules and weightings contained in Section 4 – *Specification Requirements* of this document in order to identify the most economically advantageous tender. The tenderer with the most economically advantageous tender will be requested to submit evidence in order to be validated against the eligibility criteria and rules contained in section 4 of this document.

### 1.3 About Single Party Framework Agreements

#### Single Party Framework

A single party framework agreement constitutes a means of establishing overall terms and conditions in accordance with which, for a specified duration, individual contracts may or may not be awarded. In the context of a single-party framework agreement, the successful framework member does not have to compete for each new contract. It is emphasised that a framework agreement constitutes no guarantee to purchase a specific quantity of services from a particular economic operator. Indeed, the Contracting Authority reserves the right to operate outside of the framework agreement at its discretion, particularly should it become apparent that doing so would offer greater value for money. Notwithstanding the foregoing, the Contracting Authority has adopted a framework agreement approach to the procurement of the required services in order to leverage efficiencies and maximise cost savings over a four (4) year period.

#### Duration of the Framework Agreement

This Framework Agreement will have a maximum potential duration of four (4) years. In the first instance, it is anticipated that there will be an initial period of two (2) years duration, with an option to extend up yearly to a maximum of four (4) years entered into with the successful tenderer emerging from this competitive process. Following the expiry of the initial period, matters such as the successful tenderer’s performance and the continued strategic appropriateness of the Framework Agreement will be assessed by the Contracting Authority in determining whether or not subsequent contracts will be placed over the lifetime of the framework agreement. It is envisaged that any extension awarded will be for a period of at least one year,

however the precise duration of any extension will depend upon the nature of the Contracting Authority's requirements at that point in time. The Contracting Authority confirms that the period of any contracts awarded under the Framework Agreement may extend beyond the date of expiry of the Framework Agreement.

The maximum potential duration of the Single Party Framework Agreement is four (4) years. However, each contract may be terminated at any point in time in accordance with HRI terms and conditions of the Single Party Framework, a draft version of which is contained at Appendix 4 – *Terms & Conditions* of this ITT document.

Admission to the Framework Agreement will be conditional upon acceptance of the Contracting Authority's Framework Agreement Terms & Conditions, as appended at Appendix 4 of this ITT document. Tenderers are required to confirm their acceptance of the Terms and Conditions of the Framework Agreement by signing the Tenderer's Statement at Appendix 1 – *Form of Tender*. Tenderers may not amend the Framework Agreement.

#### **Award to Runner-Up**

In the event that, following the award of this Framework Agreement, the successful tenderer cannot, for whatever reason, deliver the required supplies / services to the satisfaction of the Contracting Authority, the Contracting Authority reserves the right to award the Framework Agreement to the next highest-ranked tenderer emerging from this competition, at any time during the tender validity period. This shall be without prejudice to the right of the Contracting Authority to terminate the Framework Agreement and commence a new competition at any time.

#### **Termination**

Once established, there is no obligation upon the Contracting Authority to make use of this Framework Agreement. Notwithstanding this fact, the Framework Agreement may be terminated in accordance with the Framework Agreement Terms and Conditions, a draft version of which is contained in Appendix 4 – *Terms & Conditions* of this ITT document.

#### **Consortia and Prime / Subcontractors**

Where a group of undertakings (in whatever form and regardless of the legal relationship between them) come together to submit a tender in response to this ITT document, the Contracting Authority will deal with all matters relating to this competition through a single nominated entity authorised to represent all members of the group of undertakings. The tenderer must provide details of all members of the group of undertakings and their role in the tender submission, and clearly set out the contact details including name, title, telephone number, postal address, and e-mail address of the nominated entity authorised to represent the tenderer and to whom all communications shall be directed and accepted until this competition has been completed or terminated. Correspondence from any other person will NOT be accepted, acknowledged or responded to.

Prior to and as a condition of award of the Framework Agreement, the successful tenderer shall be required to designate a single entity who will carry overall responsibility for the Framework Agreement (the "Prime Contractor"), irrespective of whether or not tasks are to be performed by a subcontractor or other consortium member (the "Subcontractor").

## 2. GENERAL SPECIFICATION OF REQUIREMENTS

Horse Racing Ireland and Subsidiaries wish to engage a suitably qualified service provider for the Provision of Hydrotreated Vegetable Oil (HVO).

Please note that is emphasised that a framework agreement constitutes no guarantee to purchase a specific quantity of supplies from a particular economic operator.

The Contracting Authority invites tenders for the establishment of a single party framework agreement for the supply of Hydrotreated Vegetable Oil HVO primarily for use in racecourse machinery as a replacement for marked gas oil, to support operational and maintenance activities across racecourse facilities, including but not limited to tracks, inner track areas, grounds, car parks, public access areas, and associated infrastructure.

The framework shall cover the supply of Hydrotreated Vegetable Oil (HVO), including all necessary ancillary services, including delivery to designated sites, fuel quality assurance, sustainability reporting, technical guidance, Analytical Reporting and after sales support

**This framework does not guarantee any minimum volume of purchases.**

### Specific Requirements

Horse Racing Ireland (HRI) launched its first Sustainability Strategy in 2024. This ambitious plan sets out a clear roadmap to reduce our carbon emissions in line with eh 2030 National Climate Plan. A key area for our organisation is the emissions generated by burning fossil fuels. We are therefore treating this aspect of our business as a priority area to address. After a successful initial trail of HVO for track machinery we are looking to expand its use in further locations to help further reduce the carbon impact related to our fleet. HRI and its racecourse subsidiaries operate a fleet of tractors, LGVs, and both company and grey fleet cars. The HVO is envisaged to be used mainly in its track fleet.

The successful candidate will there be required to:

- Provide introductory briefings to drivers detailing the operational work practices around day-to-day use of HVO compared to diesel.
- Provide certification and documentation to confirm the providence of the product
- Maintain Stock levels and deliveries as required by racecourses.

### Sustainability Certification

The HVO supplied shall be produced from sustainable waste derived feedstocks and residues. The Supplier shall disclose the feedstock composition of all HVO supplied. HVO derived from virgin palm oil or from feedstocks associated with deforestation shall not be accepted.

A clear and verifiable audit trail for all feedstocks shall be maintained, and the fuel must be certified under the International Sustainability and Carbon Certification (ISCC) scheme or an equivalent recognised sustainability certification scheme. Documentation supporting compliance with fuel quality and sustainability standards shall be made available upon request.

Suppliers shall clearly disclose the origin of all feedstocks and demonstrate compliance with the following standards and requirements:

- Full compliance with EN 15940 specifications for paraffinic diesel fuel;
- Certification under the ISCC scheme or an equivalent recognised sustainability certification scheme;
- Full compliance with the requirements of the Renewable Energy Directive (RED II and any subsequent amendments); and
- Provision of a declaration of feedstock origin and sustainability certification for each batch supplied.

The Contracting Authority reserves the right to request supporting evidence of feedstock origin and sustainability credentials at any stage during the contract. The Contracting Authority (including Horse Racing

Ireland) may also, at its discretion, take fuel samples for independent analysis to verify compliance with HVO specifications.

Failure to comply with the sustainability requirements set out in this specification, including the requirement that all HVO supplied is produced from sustainable waste-derived feedstocks and residues, shall constitute a material breach of contract. In the event of such non-compliance, the Contracting Authority reserves the right to:

- Reject any non-compliant product and require its replacement at no additional cost;
- Suspend or withhold payment in respect of the non-compliant supply;
- Apply appropriate contractual remedies, including service credits or liquidated damages (where provided for under the Contract);
- Require the submission and implementation of corrective action plans within a specified timeframe; and
- Terminate the Contract, in whole or in part, in cases of material, persistent, or repeated non-compliance.

The Contracting Authority further reserves the right to seek additional supporting evidence of compliance at any stage and to independently verify sustainability credentials.

### Carbon Reporting Requirements

The successful supplier shall provide quarterly reports detailing:

- Volume of HVO supplied to each site.
- Feedstock composition and origin (as stated above)
- EHG emissions intensity of fuel supply chain (Well-to-wheel carbon intensity data)
- Greenhouse gas emissions reduction achieved relative to conventional diesel.
- Sustainability certification references and associated batch numbers.

The supplier shall provide sufficient information to support HRI's sustainability reporting obligations and carbon accounting requirements.

### Delivery Locations & Volumes

it is envisaged that HRI Racecourses will have initial requirements under the framework, see appendices for each map with tanks holding around 2,500 Litres. We estimate the following annual quantities for each site. This is subject to variation due to weather events and racing fixture impacts:

Location	Indicative Volume (Litres) per annum
Fairyhouse Racecourse	13,000
Leopardstown Racecourse	15,000
Navan Racecourse	12,000
Tipperary Racecourse	38,000 (Indicative volume following completion of Tipperary all Weather Track)
Racing Academy & Centre of Education (RACE)	2,500

**Site delivery locations: The delivery address for the initial contract is as follows:**

Leopardstown Racecourse, Foxrock, Dublin 18

Fairyhouse Racecourse, Ratoath, Co Meath

Navan Racecourse, Proudstown, Navan, Co Meath

Tipperary Racecourse, Limerick Junction, Tipperary

In the first instance it is envisaged that HRI Racecourses will have requirements under the framework. However, this framework will remain open to all other HRI subsidiaries or indeed any other organisations that

have a funding or governance relationship with HRI. The Contracting Authority reserves the right to use this framework for any other industry body in which it is involved.

### **Frequency of Deliveries**

Deliveries are ad-hoc but there will be seasonal demand depending on racing fixtures and weather. Nominated racecourse staff will submit orders as required.

The supplier shall:

- Advise on standard lead times for deliveries
- Deliver fuel within an agreed response time following receipt of an order.
- Maintain sufficient stock levels to avoid supply interruptions.
- Have contingency arrangements in place to manage fuel shortages, transport disruptions or emergency situations.
- Provide an emergency contact facility during normal operating hours.

### **Compliance with Regulations**

It is a condition for that suppliers are fully compliant with all statutory legislation pertaining to their operations including, but not limited to, The European Communities (Carriage of Dangerous Goods by Road and Use of Transportable Pressure Equipment) Regulations 2011 (S.I. No. 349 of 2011), as amended. Referred to as ADR.

Suppliers of fuel must also ensure that:

- All delivery staff and personnel have all appropriate training in line with their duties and responsibilities under ADR.
- They only use vehicles/tankers certified annually by the Road Safety Authority ([www.rsa.ie](http://www.rsa.ie)) for the transport of dangerous goods.
- Racecourse staff are contacted in advance to ensure their presence on site. Racecourse staff have keys to the tanks and will sign for the deliveries. Contact details for same will be provided on award of contract.

This does not exclude any additional statutory requirements that may also apply. The successful supplier must be able to provide copies of signed delivery notes on request.

### **Health, Safety, & Environmental**

The supplier must ensure the HVO adheres to Regulation (EC) No. 1907/2006 as amended. HVO is classed as Transport Hazard Class 3 and should be transported and handled according to the standards set out in the Material Data Safety Sheet available for the product.

Tenderers shall provide:

- Current Health and Safety Statement.
- Evidence of ADR compliance.
- Evidence of staff training and competency.
- Procedures for spill prevention and emergency response.
- Environmental management procedures relevant to fuel transport and delivery.

The supplier shall immediately report any spill, leak, environmental incident or safety incident arising during delivery operations.

### **Contract Management**

The successful supplier shall nominate a dedicated contract manager who will act as the primary point of contact for HRI throughout the contract period.

Regular review meetings may be requested by HRI to discuss performance, volumes supplied, sustainability reporting and service delivery.

### **Pricing**

Tenderers should clearly outline:

- The purchase price for HVO shall be linked to a recognised fuel pricing index (e.g. Argus) or equivalent
- The quantities provided are indicative only and are for the purpose of evaluation. These quantities are based on historical usage of Marked Gas Oil no guarantee of future volume is implied.
- The pricing model shall be based on a fixed margin (percentage) applied to the indexed price.
- The applicable price per litre (PPL) for each delivery shall be calculated based on the indexed price for the relevant delivery week plus the agreed margin.

**Example:**

- Indexed price on 29<sup>th</sup> June: €1.20 per litre
- Delivered price: €1.25 per litre
- This represents a margin increase of €0.05 per litre, equivalent to approximately 4.17%

The same percentage margin (4.17% in this example) shall be applied to all subsequent indexed prices during the contract period to determine the delivered PPL and shall be fixed for the duration (4) years of the Framework Agreement. Any percentage changes for subsequent years of the Framework Agreement must be detailed and confirmed in writing to the Contracting Authority's Contract Manager / Procurement Manager for review and discussion at least three (3) months prior to any acceptance.
