Part 1: Introduction

- 1.1 University College Cork, National University of Ireland (the “Contracting Authority”) invites tenders (“Tenders”) to this request for tenders (“RFT”) from economic operators (“Tenderers”) for the provision of the services as described in Appendix 1 to this RFT (the “Services”).
- 1.2 In summary, the Services comprise: A cloud-based software platform that supports UCC’s risk management objectives.
- 1.3 *Not Used*
- 1.4 This public procurement competition (the “Competition”) will be conducted in accordance with the open procedure under the European Union (Award of Public Authority Contracts) Regulations 2016 (Statutory Instrument 284 of 2016) (the “Regulations”). Any contract that may result from this Competition (the “Services Contract”) will be issued for a term of 4 years (“the Term”).
- 1.5 The Contracting Authority reserves the right to extend the Term for a period or periods of up to 12 months with a maximum of 2 such extension or extensions on the same terms and conditions, subject to the Contracting Authority’s obligations at law.
- 1.6 The Contracting Authority estimates that the expenditure on the Services to be covered by the proposed Service Contract may amount to some €135,000 (excl. VAT) over the Term and any possible extensions. Tenderers must understand that this figure is an estimate only based on current and future expected usage.
- 1.7 Contracting Authority policy seeks to encourage participation on a fair and equal basis by Small and Medium Enterprises (“SME”s) in this Competition. SMEs that believe the scope of this Competition is beyond their technical or business capacity are encouraged, subject to paragraph 2.5, to explore the possibilities of forming relationships with other SMEs or with larger enterprises. Through such relationships they can participate and contribute to the successful implementation of any Services Contract that may result from this Competition and therefore increase their social and economic benefits.
- Larger enterprises are also encouraged, subject to paragraph 2.5, to consider the practical ways that SMEs can be included in their proposals to maximise the social and economic benefits of any Services Contracts that may result from this Competition.

Part 2: Instructions to Tenderers

2.1 IMPORTANT NOTICES

2.1.1 While every effort has been made to provide comprehensive and accurate information in all notices and documents prepared for the purposes of this Competition, the Contracting Authority does not accept any liability or provide any express or implied warranty in respect of any such information. Tenderers must form their own conclusions about the solution needed to meet the requirements set out in this RFT and may wish to consult their legal advisers.

2.1.2 The Contracting Authority does not bind itself to accept the lowest priced or any Tender. This RFT does not constitute an offer or commitment to enter into a Services Contract. No contractual rights in relation to the Contracting Authority will exist unless and until a formal written Services Contract has been executed by or on behalf of the Contracting Authority. Any notification of preferred bidder status by the Contracting Authority shall not give rise to any enforceable rights by the Tenderer. The Contracting Authority may cancel this Competition at any time prior to a formal written Services Contract being executed by or on behalf of the Contracting Authority. The award of a Services Contract does not confer exclusivity on the successful Tenderer.

2.1.3 This RFT supersedes and replaces any and all previous documentation, communications and correspondence between the Contracting Authority and Tenderers, and Tenderers should place no reliance on such previous documentation and correspondence.

2.1.4 In this clause 2.1.4, “Data Protection Laws” means all applicable national and EU data protection laws, regulations and guidelines including but not limited to Regulation (EU) 2016/679 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (the “General Data Protection Regulation”), and any guidelines and codes of practice issued by the Office of the Data Protection Commission or other supervisory authority for data protection in Ireland from time to time.

The Contracting Authority will be a Data Controller (where Data Controller has the meaning given under the Data Protection Laws) in respect of any Personal Data (where Personal Data has the meaning given under the Data Protection Laws) required to be provided by the Tenderer in response to this RFT.

The Tenderer, as Data Controller in respect of any Personal Data provided by it in its Tender, is required to confirm in the statement required under paragraph 2.4 below that all Data Subjects (where Data Subject has the meaning given under the Data Protection Laws) whose Personal Data is provided by the Tenderer have consented to the processing of such Personal Data by the Tenderer, the Contracting Authority, the Evaluation Team and the supplier of the etenders.gov.ie website, for the purposes of the participation of the Tenderer in this Competition or that the Tenderer otherwise has a legal basis for

providing such Personal Data to the Contracting Authority for the purposes of its participation in this Competition.

- 2.1.5 The Contracting Authority would refer Tenderers in particular to the provisions of Regulation (EU) 2022/1031 on the access of third country economic operators, goods and services to the Union's public procurement and concession markets and procedures supporting negotiations on access of Union economic operators, goods and services to the public procurement and concession markets of third countries (International Procurement Instrument – IPI), and to their obligation to comply therewith.

In particular, tenderers and candidates should note in Article 6 of Regulation (EU) 2022/1031, the obligations for a Contracting Authority in the context of a procurement procedure where the EU Commission has adopted an IPI measure.

- 2.1.6 Tenderers are referred to the provisions of Regulation (EU) 2022/2560 of the European Parliament and of the Council on Foreign Subsidies distorting the Internal Market, in addition to Commission Implementing Regulation (EU) 2023/1441, and their obligation to comply therewith. In particular, tenderers and candidates should note the requirements in Articles 28 and 29 of Regulation (EU) 2022/2560 relating to the prior notification or declaration of foreign financial contributions, where the estimated value of the public procurement procedure is equal to or greater than the applicable financial thresholds set out therein. In that regard, Tenderers and Candidates are referred to Appendix 3A of the RFT.

2.2 COMPLIANT TENDERS

- 2.2.1 If a Tenderer fails to comply in any respect with the requirements of this paragraph 2.2.1, the Contracting Authority reserves the right to reject the Tenderer's Tender as non-compliant or, without prejudice to this right and subject to its obligations at law, to take any other action it considers appropriate including but not limited to:

- seeking written clarification from the Tenderer;
- seeking further information from the Tenderer; or
- waiving a requirement, which in the Contracting Authority's view, is non-material or procedural.

Tenderers are required:

- (a) To complete and submit with their Tender the electronic version of the European Single Procurement Document ("[eESPD](#)"). Tenderers may submit an eESPD which has already been used in a previous procurement procedure PROVIDED THAT they confirm that: (i) the information contained in it continues to be correct and (ii) that they satisfy the Selection Criteria for this Competition as set out at part 3.2 below;
- (b). To submit all documentation which this RFT requires to be submitted with their Tender;
- (c) To follow the format of this RFT and respond to each element in the order as set out in this RFT;
- (d) To conform to and comply with all instructions and requirements set out in this RFT;

- (e) To submit the statement required under paragraph 2.4 below; and
- (f) Not to alter or edit this RFT in any way.

2.2.2 Without prejudice to the generality of paragraphs 2.2.1, failure to comply with paragraph 2.6.1, 2.6.2 or 2.6.3 below will render the Tender non-compliant and it will be rejected.

2.3 SERVICES CONTRACT

- 2.3.1 Tenderers should note the terms and conditions of the Services Contract at Appendix 5 to this RFT.
- 2.3.2 Tenderers are required to confirm their acceptance of the terms and conditions of the Services Contract by signing the Tenderer's Statement at Appendix 3. Tenderers may not amend the Services Contract.

Note: Overall Minimum Requirements for Award: Tender submissions must achieve **[60%]** of the available marks for each of the criteria listed above. No minimum score applies for Costs and Sustainability.

Costs are calculated as follows:

The following formula will be applied to the cost score:

The lowest cost tender that also meets all of the minimum requirements of the qualitative award criteria will receive the maximum score achievable under this criterion. The scores of the other valid tenders will be calculated using the following formula:

Lowest Cost from a Bona Fide Tender	A
Cost for the tender being evaluated	B
Maximum Points available for Cost	250
Formula employed	$\frac{250 \times A}{B}$

The other **non-cost** criteria as identified in this tender, for scoring purposes are proportionally ranked under the headings of:

Score	Meaning	Interpretation
90% - 100%	Excellent	A response that demonstrates an excellent level of quality and understanding of requirements and provides comprehensive

		and convincing assurance that the Tenderer will deliver to an excellent standard.
80% - 89%	Very Good	A response that demonstrates a very good level of quality and understanding of requirements and provides assurance that the Tenderer will deliver to a very good standard.
70-79%	Good	A response that demonstrates a satisfactory level of quality and understanding of requirements and gives reasonable assurance of delivery to an adequate standard but does not provide sufficiently convincing assurance to award a higher mark.
60-69%	Fair	A response where reservations exist. Lacks full credibility/convincing detail, and there is a significant risk that the required services would not be delivered.
59% or below	Poor	A response where serious reservations exist. This may be because, for example, insufficient detail is provided, and the response has fundamental flaws, or is seriously inadequate or seriously lacks credibility with a high risk of non-delivery.
0%	No Response	Response completely fails to address the criterion under consideration.

3.3.2 Subject to paragraphs 2.1 (Important Notices) and 3.5 (Standstill Period) of this RFT, award of the Services Contract to the highest ranked Tenderer (as determined by paragraph 3.3.1) will be conditional upon:

- (a) the Tenderer submitting the following evidence in respect of the Tenderer (including the Prime Contractor and any Subcontractors, as applicable in accordance with paragraph 3.1 above) to the extent not already provided, within seven (7) days of request by the Contracting Authority: (i) a Declaration in the form attached at Appendix 4; (ii) if applicable, evidence to the effect that measures taken by the entity concerned are sufficient to demonstrate its reliability despite the existence of a relevant Exclusion Ground; (iii) all or any of the supporting documents specified at paragraph 3.2; and
- (b) the evidence specified at paragraph 3.3.2(a) above demonstrating that each entity concerned meets the Selection Criteria and the compliance requirements specified at paragraph 3.1(b) and (c) above.

3.4 PRESENTATION OF PROPOSALS

Tenderers may be required to make a presentation of the proposal contained in their Tender. The Contracting Authority will not be responsible for the cost of such presentations (in accordance with paragraph 2.8). Performance at presentations will NOT be evaluated.

3.5 STANDSTILL PERIOD

3.5.1 In circumstances where the European Communities (Public Authorities' Contracts) (Review Procedures) Regulations 2010 (Statutory Instrument 130 of 2010), as amended by the

European Communities (Public Authorities' Contracts) (Review Procedures) (Amendment) Regulations 2015 (Statutory Instrument 192 of 2015) and the European Communities (Public Authorities' Contracts (Review Procedures) (Amendment) Regulation 2017 (Statutory Instrument 327 of 2017) apply, no contract can or will be executed or take effect until at least fourteen (14) calendar days after the day on which the Tenderers have been sent a notice informing them of the result of this Competition ("Standstill Period") if such notice is sent by electronic means. The Standstill Period shall be sixteen (16) calendar days if such notice is sent by other means. The preferred bidder will be notified of the decision of the Contracting Authority and of the expiry date of the Standstill Period.

- 3.5.2 Tenderers should note that the Contracting Authority may, when notifying Tenderers of the results of this Competition, include the scores obtained by the Tenderer concerned and the scores obtained by the preferred bidder in respect of each award criterion assessed by the Contracting Authority.

3.6 RETURN OF SIGNED CONTRACTS

- 3.6.1 The successful Tenderer must sign and return the Services Contract and the Confidentiality Agreement, both in duplicate, to the Contracting Authority no later than 14 calendar days from the date of expiry of the Standstill Period unless notified otherwise in writing by the Contracting Authority. A signed Services Contract returned by the successful Tenderer is not binding on the Contracting Authority until the Contracting Authority has signed the Services Contract in accordance with paragraph 2.1.2 above.
- 3.6.2 Where the signed Services Contract and the Confidentiality Agreement have not been received by the Contracting Authority within the period as specified at paragraph 3.6.1 then the Contracting Authority may proceed to award the Services Contract to the next highest-ranked Tenderer in accordance with paragraph 3.6.1 above.

Appendix 1: Requirements and Specifications

Tenderers must address each of the issues and requirements in this part of the RFT and submit a detailed description in each case which demonstrates how these issues and requirements will be dealt with / met and their approach to the proposed delivery of the Services.

A mere affirmative statement by the Tenderer that it can/will do so or a reiteration of the tender requirements is NOT sufficient in this regard.

Section 1.0 Introduction

UCC is an award-winning institution with a history of independent thinking. Established in 1845 as Queen's College, Cork, with just 115 students, it is now a constituent university of the National University of Ireland with a student population exceeding 26,000. As a leading Irish University, UCC now ranks 246th on the QS University Rankings, placing it inside the world's top 250 universities.

UCC is renowned for its comprehensive research and education and is recognised as having the world's first Green Campus, reflecting its dedication to environmental sustainability and responsible resource management. The university offers a wide range of undergraduate and postgraduate programs across various disciplines, including arts, humanities, business, law, engineering, science, and medicine. The university's research output is extensive, with significant contributions to Ireland's economic, societal, environmental and cultural resilience and prosperity. UCC Futures ([UCC Futures - Securing our future through excellence in research | University College Cork](#)) encapsulates our research focus, from the Arts, Humanities and Social Sciences, areas of Business, Law, Medicine and Health to the Sciences, Engineering and Food Science.

UCC is also known for its strong emphasis on innovation and industry engagement, fostering a culture of entrepreneurship and practical learning which enhances the employability of its graduates and the impact of our activities.

The Strategic Plan ([Securing our Future - UCC Strategic Plan 2023-2028](#)) captures UCC's focus in terms of robust and sustainable impact from teaching, learning, research, innovation and our student and alumni activities. Built on strong values and a mission to enrich society and the stewardship of our planet, UCC is securing the future for our people, our university and our planet.

1.1 University Structure

UCC comprises a number of Colleges, Schools and Functional Areas encompassing various administrative, academic, and support services that contribute to the university's overall mission¹. See Appendix 12 for Further information.

1.2 Enterprise Risk Management at UCC

UCC considers risk management to be fundamental to good management practice and a key aspect of corporate governance. Effective risk management provides an essential contribution towards the achievement of the University's strategic and operational objectives and goals and is an integral part of the University's decision-making process. It is incorporated within the strategic and operational planning processes at all levels across all aspects of the University's local, national and international business.

¹ [Schools & Departments | University College Cork](#)

“Ultimately, effective risk management will help to ensure that the University maximises its opportunities and minimises the risks it faces, thereby improving our ability to deliver our strategic and operational priorities and improve outcomes.”²

The overall aim is to improve UCC’s ability to deliver on its strategic goals and objectives by providing a systematic and transparent risk management framework, which creates an environment that adds value to our academic and professional services. The University’s risk management objectives are to:

- Ensure risk management is clearly and consistently integrated and evidenced in UCC culture.
- Manage risk in accordance with legislation and best practice, including, but not limited to the Safety, Health and Welfare at Work Act 2005 and associated Regulations, ISO 31000:2018, ISO 45001 and the IUA Code of Governance for Irish Universities.
- Identify and apply the University’s Risk Appetite.
- Agree the appropriate Risk Control Approach (4T’s – Terminate, Transfer, Treat, Tolerate).
- Anticipate and respond to changing economic, social, environmental and legislative requirements.
- Consider compliance with health and safety, insurance, governance and legal requirements as a minimum.
- Prevent loss, injury and damage and reduce the cost of risk and opportunities.
- Inform policy and operational decisions by identifying risks and their possible impact.
- Raise awareness of the need for risk management by all those connected with the University.
- Assign accountability to all staff for the management of risks within their areas of control.
- Ensure that all significant risks to the University locally, nationally and internationally are identified, assessed and where necessary treated and reported to the UCC Governing Authority, Audit and Risk Committee and University Leadership Team in a timely manner through the UCC Enterprise Risk Management Committee.
- To provide a commitment to staff that risk management is a core management competency.

The following deliverables contribute to the above and are of particular relevance to this Request for Tender:

- Maintenance of a risk register aligned with the University’s business, strategic and operational objectives.
- Regular compliance audits to ensure adherence to regulatory and policy requirements.
- Ongoing risk performance monitoring, supported by a structured cycle of improvements.

Our Enterprise Risk Management (ERM) Framework adopts a holistic cross-functional approach in a diverse, multi-faceted organisation, which includes:

- Identification and Management of strategic and operational risks and opportunities.
- Emergency Management and Business Continuity Planning.
- Insurance and Claims Administration.
- Occupational Health and Safety management.
- Specialist activities around (non-exhaustively) radiation, chemicals, biological agents, manufacturing, events, etc.

The ERM Function in the Office of Corporate and Legal Affairs (OCLA) is structured around the above integrated streams and comprises highly committed and dedicated Risk Management, Emergency Management, Insurance and Claims and Health & Safety professionals and support staff, providing a strong and dynamic service that combines expert resources and best practices for the delivery of the

² UCC Risk Management Policy 2024

highest possible standard of service across the key ERM support areas. Further and/or local support is provided to the Organisation by additional health and safety, radiation and research specialists.

1.3 Responsibility for Risk Management

Clear identification of roles and responsibilities ensures the successful adoption of risk management and demonstrates that it is embedded in the culture of the University.

Risk management is a core responsibility of every person in the University community. However, certain groups and individuals and a number of Committees, as shown in the following chart, have additional operational and strategic risk responsibilities:

(RM Policy 2024, p16, Fig 5)

1.4 UCC Risk Registers

It is essential that a unified risk management approach be implemented consistently across all levels of the University.

Risks and relevant control measures and actions are managed through the University's ERM Process and Risk Registers at the following levels³:

- **University Risk Register** – University/Corporate-level risks, including some high risks escalated from Functional Area Risk Registers.
- **Functional Area Risk Registers**⁴ (including College Risk Registers) - Covering the entire Functional Area's risk landscape, including constituent sub-units, projects and research projects (i.e. all below).
- **School/ sub-unit Risk Registers** – Covering strategic and operational risks arising at local level (including project, Futures Thematic Area and research risk registers as applicable). It is expected that these Risk Registers will be cascaded down to the departmental level, therefore, any risk management system must have the capability to support this level of granularity.
- **Project, Futures Thematic Area and Research Risk Registers** - All major projects⁵ including research are required to maintain a Project Risk Register. Research activities cover everything from desk to wet lab, and office to extreme environments, therefore in addition to covering general risk issues, specific disciplines require individual consideration.

Prior to inclusion in the risk register, risks are primarily assessed using the Bowtie⁶ Risk Assessment methodology. However, a range of other specialised risk assessment tools are also employed where appropriate – for example, in the evaluation of specific Health and Safety risks such as chemicals and manual handling activities. Risks must be assessed in accordance with legislation (where applicable, e.g. health and safety risks in accordance with the Safety, Health and Welfare at Work Act 2005 and associated Irish and European Regulations), when they arise and reviewed either annually, or whenever there is any change in the matters to which they relate, whichever is the shorter period.

Notwithstanding the above, a distinct review process exists for university level risks owned by members of the University Leadership Team (ULT). These risks are formally scored at least quarterly. This is a mandatory requirement of the Audit and Risk Committee. Risk owners are responsible for updating their bowtie assessments and corresponding related entries in the UCC Risk Register and for proposing revised risk scores for consideration by Enterprise Risk Management Committee (ERMC); recommendations from ERMC are then submitted to ULT for approval.

Changes to risks recorded in Functional Area and school/sub-unit risk registers, including updates to risk scores, are managed locally and entered into the Risk Register at the appropriate level. Escalation pathways and criteria are set out in the UCC Risk Management Policy – User Guide.

³ See Appendix 8

⁴ There is an additional need for all research risks to be reported by UCC Futures thematic area (which is cross College)

⁵ "Major Project" is not currently defined in the Risk Management Policy and so an amount of flexibility will be necessary in the package in order to accommodate possible future definitions. It is possible that the determination of whether a project is major or not will be influenced by the monetary value, time and schedule urgency, organisational, managerial, including risk management, and technical complexity of the project.

⁶ See Appendix 11

1.5 Cloud-Based Risk Management System

UCC is planning to introduce a modern, cloud-hosted Software as a Service (SAAS)-based Risk Management System (RMS), to:

- Enhance enterprise risk management,
- Support compliance, and
- Improve risk governance, understanding around risks and the integration of risk assessment and risk management into day-to-day activity.

This system **will fully replace** the current MS Excel-based Risk Register spreadsheets, providing a more robust, scalable, and user-friendly solution.

The Risk Management System will support comprehensive risk assessment and management by providing a centralised platform for logging, viewing and tracking risks, monitoring compliance, assigned control actions, and performance. The latter will be achieved through reporting against Key Risk Indicators⁷ and Key Control Indicators⁸.

To support the Contracting Authority's Risk Management service, UCC is seeking an end-to-end managed service, which covers:

- Hosting and licensing,
- Initial implementation, process mapping and system configuration, data migration, training and familiarisation, ongoing maintenance, support and development, and possible eventual termination and data extraction.

Purpose of the Risk Management System (RMS):

- Streamline risk assessment and risk management processes.
- Support evolution of Risk Management processes within UCC as they develop and evolve to incorporate legislative change and advances in Risk Management processes and protocols.
- Facilitate the adoption of Bowtie risk assessment and risk appetite.
- Centralise and standardise risk recording, analysis, and tracking.
- Facilitate risk and action/control monitoring through simple, user-friendly and appealing dashboards and reports.
- Use data feeds from UCC (and potentially other) data sources (e.g. MS Power BI and the UCC Data Hub) to populate and report on Key Risk Indicators and Key Control Indicators.
- Feature stratified⁹ risk registers, with risk escalation and de-escalation pathways and criteria.
- Provide information on risk appetite, risk thresholds and risk tolerance for each identified impact for each risk¹⁰.

⁷ Key Risk Indicators (KRI) are metrics or indicators (early warnings) used to assess and measure potential risks within an organisation. KRI help identify and monitor risks before they escalate into negative outcomes. Rather than waiting for adverse consequences to occur, KRI allow proactive risk management.

⁸ Key Control Indicators (KCIs), also known as Control Effectiveness Indicators, are metrics that Measure how well specific controls are performing. KCI quantify how effectively a particular control tool, approach, or methodology is functioning. Managers establish desired tolerances for controls before measuring KCI. KCI play a crucial role in managing risk and strategy execution.

⁹ I.e. broken down by management level: University (University Leadership Team – ULT - level); Functional Area/College (ULT Member level); Sub-unit Registers/School, Department, Project (Local Manager level)

¹⁰ Per UCC agreed Risk Appetite and Thresholds – Further information in UCC Risk Management Policy

Users:

The system will potentially be accessed by more than 20,000 users, including¹¹:

Access Group	Access Rights	Purpose	Basis
1 ERM, Internal Audit and ITS Teams (Superusers)	• All areas/registers • Full view, edit and administration rights	Oversight and monitoring and system administration	Essential
2 University Leadership Team and Enterprise Risk Management Committee	• UCC Risk Register level • View and edit rights	Oversight and monitoring	Essential
Heads of Colleges, Functional Areas, Schools and departments ¹² , Risk owners (or delegate)	• FA and local Risk Register level • View and edit rights	Assessing and managing risks and risk registers at various levels	Essential
3 Governing Authority and GA Committee members (including Audit and Risk, People and Culture and Finance)	• UCC Risk Register level • View only	Oversight and monitoring	Essential
All staff and potentially some students	• Local risk register and risk assessments • View only	View risk assessment for operational application	Desirable

1.6 Audit Management Module (Desirable Module):

UCC is aware that some systems may include, or have the facility to include audit management functionality, either as an integral component of the risk register module, or as supplementary module.

Risk Management is the primary requirement of the system, however if available such a module should provide sufficient functionality to support the internal audit lifecycle and audit issue tracking, i.e. support the planning, execution, reporting, and follow-up of internal audits across the University, with a particular emphasis on integration with the University Risk Register (allowing risks recorded in the Risk Management module to be referenced when developing the annual audit plan). See Section 2.8 for the functional requirements of the Audit Management Module (if available).

The tenderer is asked to indicate if there is an audit management module (meeting the specification in section 2.8) either integrated within the system, or available as a separate module and whether there is an additional cost for this functionality (whether integrated with the risk package, or a separate module).

Note: As Risk Management is the primary requirement of the system, UCC does not commit to purchasing this service/functionality – it is therefore considered “desirable” rather than “essential”.

¹¹ See Appendix 8 for full breakdown

¹² [Schools & Departments | University College Cork](#)

Section 2.0 Key Requirements of the Risk Management System:

2.1 General Requirements:

- The system must be capable of taking risk assessments, in both standardised and bespoke formats, inputted by UCC users, and generating a multi-level, stratified risk register, comprising over 100 sub-risk registers as follows¹³:
 - University Level Risk Register (1 no.)
 - Fifteen (15 no.) Functional Area Risk Registers (headed by ULT members) – including the four Colleges, Research and Innovation, Registry, Buildings and Estates
 - Eighty (80 no.) sub-unit registers – including schools and major Research Centres within the Colleges and ten (10 no.) UCC Futures thematic areas
 - Six (6 no.) subsidiaries
 - Six (6 no.) EIB Projects
 - Four (4 no.) Research Centres – assigned to relevant colleges¹⁴
 - Other(s) undefined – e.g. for projects and future rollout at Department level.
- The system should allow access for 20,000+ users with varying permissions and roles.¹⁵
- The system must be able to handle large datasets and complex relationships, scalable as the register grows.
- User roles must be defined with appropriate permissions.
 - **Access Group 1** - There will be a very small number of “superusers” (up to 20), who require full rights, including system configuration and access to a testing/UAT /development platform.
 - **Access Group 2** – Up to 500 users will require the ability to input risk assessments, KRI/KCI data and action updates, receive automated alerts and tracker information, view dashboards, carry out searches and print assessments and reports.
 - **Access Group 3** - The remainder of the users (20,000+) will only require restricted rights to carry out searches, view and print risk assessments and risk registers and, if appropriate, view dashboards.
- The following should be included and periodically updated:
 - An easy to access (all users) knowledgebase¹⁶ for risk assessments and potential controls.
 - A range of template/standard risk assessments and forms for tailoring¹⁷.
 - A set of template dashboards for immediate use and for tailoring (assuming appropriate permissions).

¹³ See Appendix 8.

¹⁴ Please note this the current breakdown. Each of the SFI Research Centres is in a process of transition, as funding evaluations are underway by Research Ireland.

¹⁵ See Appendix 8 and section 1.5 for further information.

¹⁶ **knowledge base (KB)** - In the context of this specification a knowledge base is made up of structured, searchable documentation that supports users in understanding and using the tool effectively. These articles typically include would include, but are not limited to:

- **Step-by-step guides** on how to enter, update, and assess risks.
- **Definitions and examples** of common risk management terminology, risk categories and risk scorings - likelihood, and impact, etc., risk assessment methodology (e.g. bowtie), risk appetite terms and application, template risk assessment forms, common risks and controls.
- **Instructions for using features** like importing/exporting risks, assigning ownership, and linking controls or mitigation actions.
- **FAQs and troubleshooting tips** for common user issues.

¹⁷ See Appendices 9 and 10

- A list of buildings and locations (compiled during system configuration) for use in bowties and risk registers.
- The system should be easily updatable as compliance requirements and regulations change¹⁸.
- The introduction of the system must be supported by full onboarding and a system implementation roll-out package, including but not limited to IT/system configuration information, process mapping, system/data population transfer and ready access to helpdesk support.

2.2 Risk Register Capability:

- The Risk Management System must generate a comprehensive risk register aligned with UCC's Risk Management Policy, User Guide and the institutional [Strategic Plan](#), both current and configurable with future institutional strategic plans. The Policy and User guide is available by email request.
- The system **must** feature clear risk register screens stratified as per 2.1 and Appendix 13. The risk register will include standard fields ("core fields") that align with risk assessments and as stipulated by UCC at the software implementation stage.
- The system **must** feature clear risk assessment input screens aligned to the bowtie risk assessment methodology¹⁹. That is, it must be possible to input Bowtie Risk Assessments directly into the tool. The tool must then automatically extract this information and compile risk registers at appropriate organisational levels (per clause 2.1 and Appendices 8 and 13) in accordance with above.
- It must feature an intuitive and user editable risk scoring methodology (UCC uses a 5x5 matrix – the system must be capable of utilising this matrix), enabling users to input risk data, assign UCC's impact and likelihood scores, and calculate overall raw and residual risk scores.
- The standard/core fields for the risk assessment will be (note the system must feature the ability to add, remove and rename fields as required²⁰):
 - Assessment Reference Number
 - Assessor
 - Risk Owner
 - Functional Area
 - School/Department
 - Head
 - Task/Area
 - Building/Location
 - Strategic Goals
 - Date
 - Context/ Situation we are Trying to Protect
 - Causes/ Threats
 - Control Barriers (preventative)
 - Control Barrier in Place or Action Required
 - Top Event

¹⁸ All relevant Irish and European Legislation, including but not limited to the Safety, Health and Welfare at Work Act 2005 and all associated Regulations.

¹⁹ See appendix 11

²⁰ Note there may be certain "core fields" within the risk register. These will need to be included in the "bowtie" and any other type or risk assessment included in the system. These fields are to be agreed with UCC at software implementation stage. It should be possible to amend these, but only by nominated UCC superusers and with approval from the Director ERM or Corporate Secretary.

- Defence Barriers (mitigative)
- Defence Barrier “in Place” or “Action Required”
- Consequences/ Impacts (select from drop-down with free text for additional information). Impact areas must include the following (note the system must feature the ability to add, remove and rename Impact types as required):
 - Strategic
 - Operational
 - Regulatory: Compliance/ Legal
 - Financial
 - Reputational
 - Business Continuity
 - Health and Safety/ Injury
 - Security (e.g. data risk)
- Key Risk Indicators and Key Control Indicators. Ideally these will be objective and utilise automated data feeds where available (e.g. from the UCC Data Hub).
- For each Impact area identified (note the system must feature the ability to amend scorings as required)²¹:
 - Raw²² impact score (1-5 scale)
 - Raw likelihood score (1-5 scale)
 - Raw total risk score (1-25 scale) – System calculated, based on figures input for raw impact and likelihood.
 - Residual²³ impact score (1-5 scale)
 - Residual likelihood score (1-5 scale)
 - Residual total risk score (1-25 scale) – System calculated, based on figures input for residual impact and likelihood.
- For each risk the system must be able to recognise from all the identified impact areas, which is the highest rated raw score and the highest rated residual score. When listing the risk in the Risk Register the system should take these two “highest” scores. I.e. the system uses the worst-case scoring for risk register purposes.
- The system must be able to display UCC definable risk appetite²⁴, risk threshold²⁵ and risk tolerance²⁶ for each risk impact area of each risk. These can be chosen from in-built/pre-populated dropdowns, but should be fully editable by UCC as appetite, thresholds and tolerance may be reviewed and adjusted periodically. The system should state whether a risk is above or below the threshold or exceeds the tolerance.
- It must be possible to filter by all fields specified above as well as keywords.

²¹ See appendix 11.3 for further details of risk scorings.

²² **Raw** – scoring without any controls in place.

²³ **Residual** – scoring with current controls in place.

²⁴ **Risk Appetite**: The “*amount and type of risk that an organisation is willing to pursue or retain.*” [...in order to achieve its objectives]

²⁵ **Risk threshold** - Upper limit of risk appetite. Risk UCC is **willing** to take. Above this level control is required; below this level it may be possible to pursue/retain more risk

²⁶ **Risk tolerance** – Maximum risk UCC **capable** of taking (e.g. financial/law). Must not be exceeded. Risk above this level is unacceptable

- The system must also feature clear risk assessment input screens and feature sufficient flexibility to allow for potential risk assessment methodologies²⁷ other than Bowtie. That is, it must be possible to input alternative forms of risk assessment directly into the system. The system must then automatically extract²⁸ this information and compile risk registers at appropriate organisational levels²⁹ as with the bowtie risk assessments. Specific data entry fields will vary according to the risk type or assessment template and must be configurable.
- With respect to control³⁰ measures, it must be possible to indicate both control (prevention) and defence (mitigation/ recovery) barriers and identify those currently in place and required future (actions). The system must output action plans with identified people responsible for each action required. Data captured for each action should include, but is not limited to:
 - Link to specific risk(s).
 - Reference number.
 - College, FA, School, Department, UCC Futures thematic area/Research Centre/Institute, Project, etc.
 - Control name.
 - Control description.
 - Control owner (otherwise known as “Action Owner”) name.
 - Control type (e.g. Directive controls; Corrective controls; Detective controls; Preventative controls).
 - Control review (username and timestamp).
 - Creation date and “due by” date.
 - Creator name.
 - Review date.
 - Associated actions (description; owner; date; status).
 - Status – open, closed, etc.
 - Note: Controls must be capable of being captured as one to many, and many to one i.e. one risk can have multiple controls; one control can mitigate many risks
 - It must be possible to filter by all fields specified above as well as keywords.
- Provide real-time risk alerts and notifications³¹.
- The software system should allow users to receive alerts and notifications through email.
- Include a built-in heat map to virtually highlight areas of concern before they escalate into major risks.
- The system must give access to risk history / prior versions – and/or track changes between versions.
- The software system must support concurrent user access to risk registers, allowing multiple users to view and edit the same risk information simultaneously without data conflicts or loss of information.

²⁷ Bowtie is the primary format, however, please see appendix 9 for other potential assessment types. These will feature many of the same fields (including any “core fields”) as for “Bowtie” and will be scored in the same way.

²⁸ The fields from which the software will extract information to populate the risk register would be pre-agreed “core fields”.

²⁹ Per Appendix 8.

³⁰ For the avoidance of doubt, “control measure” here is intended to mean control barriers (preventative) and defence barriers (mitigative).

³¹ To include: Reminder notices, e.g. quarterly reminders, advance notice of submission deadlines, action confirmation deadline reminders, alerts for managers if a red risk is entered, etc. See also 2.6.

- It should be possible to assign risks, actions, progress report/status reports, etc., to all members of a team, with automated date flagging/ reminders for follow up.

2.3 Compliance Monitoring Capability:

- The system must be capable of:
 - Issuing reminders where risk assessments have not been reviewed and updated in the appropriate time frame (i.e. not less frequently than annually).
 - Action tracking capability. Automatic recommendations for improving compliance would be desirable.

2.4 Dashboards and Reporting:

The system must:

- Feature clear, intuitive, visually appealing, configurable/customisable and interactive dashboards for:
 - Tracking risks and risk metrics (including Key Risk Indicators and Key Control Indicators) for analysis of current and longitudinal data (including historical risks that have been sufficiently mitigated to be removed from the 'live' risk register).
 - Displaying risk registers and identifying consolidated real-life risks tailored to the relevant reporting level.
 - Significant (e.g. Red and Amber) risks and the effectiveness of systems and controls.
 - Any risk events that have occurred and the actions taken or proposed to mitigate the risks.
 - Likely³² or actual deviations from risk appetite levels or established systems and controls, and the time frame and status of any activities that are proposed to address these.
 - Any negative trends in higher risk areas and any new control recommendations.
 - Any new risks including their risk assessment, risk score³³, and systems and controls.
 - Any emerging risks and recommended course of action.
 - Updates on risk management actions.
- Facilitate easy reporting capabilities with export options in multiple formats, including, but not limited to, PDF, MS Word, MS Excel, MS Powerpoint. Output to Power BI is also desirable.
- Enable the generation of customisable reports and dashboards for easy trend identification and in-dept exploration of high-risk areas at point in time and longitudinally. Reporting areas will include, but not limited to:
 - Risk, cause/ threat type.
 - Consequence/ Impact type
 - Risk score/ level/ colour.
 - Risk status.
 - Changed risk level.
 - KRI and KCI and trend.
 - Strategic Goal.
 - Lead contact by FA, College, School, Department, Futures Thematic Area, etc. for risk and action.

³² E.g. based on trends in risk level over time.

³³ Note: the terms "rating" and "score" are interchangeable, but for the purposes of standardisation the word "Score" will be used in this document.

While having additional plugins is not essential. We would ask you to identify any you may have or indicate Nil if none exist.

2.11 Authentication & Authorisation

- The University has adopted a Zero Trust security architecture whose guiding principle is “Never trust, Always Verify”. Zero Trust depends on a strong identity and Access Management Framework. UCC uses single sign on (SSO) through Entra ID to provide this. The preferred authentication method is to use SAML for federated authentication. This allows federated access to all users in our tenant as well as approved guests. This provides maximum flexibility for application control. Additionally, we allow open ID connect (OIDC) authentication with OAuth 2.0 authorisation through Entra ID should an application not support SAML. In limited circumstances, we allow for authentication to be handled via the HEANET Edugate Federation. <https://www.heanet.ie/services/identity-access/edugate> where appropriate. Please confirm and give details on how you can support this requirement. The system’s authorisation model must allow a variety of roles/personas with appropriate privileges granted based on user roles/functions in the University.

2.12 Technical Support and Training Requirements (Risk Management System and, if applicable, the Audit Module):

The provider must:

- There must be a Service Level Agreement (SLA) for system availability, technical support, content backup, incident management and disaster recovery. Please include a sample SLA as an appendix.
- Provide direct access to a technical expert via email or phone, with prompt response times as needed as per the severity level table for responding.
- Have responsive account management and a helpdesk where UCC superusers can raise and track incident reports including UCC office hours telephone support. Please supply details on how UCC will raise and track such incidents and support requests and outline the processes, tools, and communication channels that will be used for issue escalation, progress tracking, and resolution reporting.
- Confirm that for severe incidents the below minimum response times apply within the SLA: (table)

Severity Level	Description	Telephone/email Response time
Priority 1 Issues	Emergency/critical, i.e. service and functions not available	Within 1 hour

Priority 2 Issues	Major impact, i.e. significant interruption to service/functions	Within 4 hours
Priority 3 Issues	Admin/operational issues	Within 2 working days

- It must be possible for UCC Technical Staff to liaise directly with technical staff from the supplier via email/conference call as part of technical implementation, configuration, and integrations, and to support new developments and troubleshooting of critical technical issues. Please detail how this will be facilitated.
- The supplier must have comprehensive documentation on all system functionality, and components, to suit distinct audiences (technical, system administrators/power users, and end-users). Please give details, and links/examples as appropriate.
- The supplier must have a structured software development lifecycle. Please give details of how you manage your software development lifecycle – including how often the system is updated (major and minor versions), how features/bugs are prioritised, and how versions/features reach end of support.
- Provide comprehensive training and onboarding designed to ensure all users attain the necessary **competency** in system usage. Please provide a copy of your training and onboarding plan detailing clear project management and governance processes to support timely delivery and continuous improvement³⁴.
- Training shall be supported by detailed, understandable and up-to-date training materials.
- Ensure training content and delivery methods are appropriately tailored to each user group and access level (e.g., administrators, superusers, end users) and include a range of delivery formats such as live sessions, e-learning modules, and reference guides.

Access Group 1 - There will be a very small number of “superusers” (10-20 est.), who have full rights, including system configuration.	• Small-group in-person training sessions on implementation commencement and “as needed” to support “superuser” requirements. • Live facilitator-led training – either in person or online (or a blend) is essential for helping users (those with input and editing rights) gain confidence and proficiency with the system. Initial training to be facilitated by the service provider with subsequent sessions provided on a train-the-trainer basis • Proposals are invited from the tenderer as to how this may be achieved for the numbers indicated whilst ensuring all applicable learning objectives are satisfactorily met.
Access Group 2 - Up-to 500 users who will input risk assessments, KRI/KCI date and action updates, receive automated alerts and tracker information, view dashboards, carry out searches and print assessments and reports.	
Access Group 3 - The remainder of the users (20k+) with restricted rights to view dashboards, carry out searches and print assessments.	• Training resources, including instructional videos, e-learning modules, clear downloadable guidance documents, and FAQs are essential for users and those who may access the system. Note these resources should be available to all user groups.

³⁴ See also clause 2.12

2.13 Implementation:

- Please provide an outline project plan (e.g. Gantt charts or equivalent) on how the proposed system will be implemented including anticipated milestones, timelines and contingency planning. Also, outline how the onboarding process will be implemented including but not limited to the system implementation and roll-out package, IT system configuration information, process mapping, system/data population/transfer (see also below), testing and user training familiarisation.
- Please confirm that the system can be fully implemented within 12 months of contract award.
- The tenderer must nominate a dedicated project manager and backup (to cover periods when project manager unavailable) to liaise with UCC on implementation planning, delivery through to project closure.
- Tenderers must provide biographies/CV's of key project personnel who would be assigned to the project to demonstrate their qualifications/skills and experience specifically for this project.
- The tenderer must outline their approach to migrate all existing relevant data (including existing Excel-based risk registers) into new software system. This should include reviewing the existing risk register data, which is currently used to monitor strategic, operational and project risks. The Tenderer will support the secure transition to the proposed platform for use within the third level education environment. The implementation should include the migration of existing data from the Excel spreadsheets, configuration of the new system in accordance with our risk management framework, and setup or appropriate user access levels reflecting senior management, college, school, unit/departmental and individual staff, etc., responsibilities.
- The Tenderer must outline how each of the major project deliverables will be tested. The type of testing should be indicated (including as appropriate Unit, Integration, regression and load testing). The Tenderer should indicate who (i.e. Tenderer or UCC) is to carry out the testing and how test evidence or documentation is to be compiled and approved by stakeholders.
- The Tenderer must outline how User Acceptance Testing (UAT), and any regression testing required after remediation, is facilitated. The Tenderer should indicate the likely resources (both human and technical) required from UCC to successfully implement User Acceptance Testing for this project.
- The Tenderer will be required as part of the project to work with a nominated UCC User Testing team to define the scope of UAT required and to work to resolve all issues arising out of User Acceptance Testing in a timely and effective manner.

2.14 End of Contract:

- Upon contract termination, UCC must be able to bulk extract all data securely and configured appropriately, with clear procedures outlined to data retention and destruction post-contract.

2.15 Sustainability:

- Tenderers should ideally utilise green data centre options or partner with hosting providers that prioritise renewable energy sources and energy efficient infrastructure.
- Tenderers must provide documentation demonstrating their commitment to sustainability and adherence to environmental standards. This may include environmental policies, sustainability reports, or certifications, including ISO certs.

- The tenderer must detail how their product is optimised to minimise energy consumption e.g. through data management, efficient algorithms, coding, and reducing power consumption requirements.

Overall, the document presents a comprehensive set of requirements for a robust Risk Management System (potentially including audit functionality as per this specification) that meets UCC's needs for effective risk management, compliance, and incident reporting, ensuring all relevant stakeholders can operate efficiently within the system.

 - 3.2.5. Whether there are any conditions attached to the financial contributions as well as its use.
 - 3.2.6. Describe the main elements and characteristics of those financial contributions (e.g. interest rates and duration in the case of a loan).
 - 3.2.7. Please explain why, with reference to the supporting documents provided under Section 6 (below).
 - 3.2.8. Explain whether the financial contribution is limited in law or in fact, within the meaning of Article 3 of Regulation (EU) 2022/2560, to certain undertakings or industries. Please explain why, with reference to the supporting documents provided under Section 6 (below).
 - 3.2.9. Explain if the financial contribution is granted only for operating costs exclusively linked with the public procurement at stake.
- 3.3** Having regard to foreign financial contributions not falling within the categories set out in Section 3.1 above, notifying parties are required to provide an overview of the foreign financial contributions equal to or in excess of EUR 1 million granted to the notifying parties in the three years prior to the notification that do not fall into any of the categories of Article 5(1), points (a) to (e) of Regulation (EU) 2022/2560. In that regard, notifying parties are required to complete Table 1 below. Notifying parties should follow the instructions provided at Section 8 (Annex II) of Commission Implementing Regulation (EU) 2023/1441.

Table 1

Information to be included in Table 1 below by notifying parties.

- (i) Group the different financial contributions per third country and per type, such as direct grant, loan/financing instrument/repayable advances, tax advantage, guarantee, risk capital instrument, equity intervention, debt write-off, contributions provided for the non-economic activities of an undertaking (see recital 16 of Regulation (EU) 2022/2560), or other.

- (ii) Include only those countries where the estimated aggregate amount of all financial contributions per country granted in the three years prior to the notification (calculated according to point (iv) below is EUR 4 million or more.
- (iii) For each type of financial contribution, provide a brief description of the purpose of the financial contributions and the granting entities.
- (iv) Quantify the estimated aggregate amount of financial contributions granted by each third country in the three years prior to the notification in the form of ranges, as specified in the notes to the Table below. For the calculation of this amount, the following considerations are relevant:
 - (a) Take into account foreign financial contributions falling into the categories of Article 5(1) of Regulation (EU) 2022/2560 and on which information has been provided under Sections 3.1 and 3.2 (above) and;
 - (b) do not take into account foreign financial contributions excluded according to points (v) and (vi) below
- (v) Notifying Parties do not need to include (in the Table below) a description of the following foreign financial contributions:
 - (a) Deferrals of payment of taxes and/or of social security contributions, tax amnesties and tax holidays as well as normal depreciation and loss-carry forward rules that are of general application. If these measures are limited, for example, to certain sectors, regions or (types of) undertakings, they have to be included.
 - (b) Application of tax reliefs for avoidance of double taxation in line with the provisions of bilateral or multilateral agreements for avoidance of double taxation as well as unilateral tax reliefs for avoidance of double taxation applied under national tax legislation to the extent they follow the same logic as the provisions of bilateral or multilateral agreements.
 - (c) Provision/purchase of goods/services (except financial services) at market terms in the ordinary course of business, for example the provision/purchase of goods or services carried out following a competitive, transparent and non-discriminatory tender procedure.
 - (d) Foreign financial contributions below the individual amount of EUR 1 million.
- (vi) The foreign financial contributions that may be relevant for the assessment of each public procurement may depend on a number of factors such as the sectors or activities involved, the type of financial contributions or other specificities of the case. In light of these specificities, the Commission may request additional information where it considers such information necessary for its assessment.
