

Additional Information

Roofing Subcontractor – Technical Capability Requirement

Tenderers must submit evidence that all personnel assigned to the roofing works are **suitably qualified and trained directly by the roofing manufacturer** for the specific system proposed.

Additionally, Tenderers must provide **three examples of similar roofing projects** completed within the last **seven years**. For each example, please provide:

- Project name, location, and client contact details.
- Start and finish dates.
- Name of the Contractor
- Scope of work completed by the above named Contractor and contact details (including phone numbers) for the Contracting Authorities and the Consultants in charge
- Confirmation that manufacturer-trained personnel executed the works.

Site Inspections

The roofing manufacturer, main contractor, and the consultant shall collaboratively conduct periodic inspections during the installation process. Upon completion of all roofing construction elements, the roofing manufacturer must perform a mandatory final inspection and written report, including confirmations of the adequacy of construction, materials, and finishes. This written report shall be submitted to the DT leader for approval and included in the handover documentation upon project completion.
