

APPENDIX 2E – TECHNICAL SPECIFICATIONS – LOT 5

Note: In all Lot specifications below any reference to “Professional” denotes equipment that is designed for sustained operational use in commercial, educational, industrial, studio, broadcast, or specialist environments, offering a high level of performance, reliability, durability, interoperability, and compliance with recognised industry standards.

Industry standard means equipment, technologies, interfaces, formats, or operating practices that are widely recognised, commonly adopted, and generally accepted within the relevant professional, educational, commercial, or technical sector, ensuring compatibility, interoperability, reliability, and long-term support.

Lot 5 – Grand Piano - Supply, Delivery and Installation of a Grand Piano in Tramore Road Campus

Lot ID Code	Item Description	Quantity
Lot5-1	Grand Piano Package – Professional-grade acoustic grand piano package centred around a conservatoire-grade grand piano of approximately 186 cm (6'1") in length, suitable for advanced music education, recital performance, accompaniment, recording, examination, and ensemble applications. The instrument shall provide exceptional tonal clarity, expressive dynamic range, responsive touch, and reliable performance within educational, performance, and recording environments. The package shall include a fitted protective cover, reinforced adjustable artist stool, and piano support/storage frame. Features - Professional-grade acoustic grand piano of approximately 186 cm (6'1") class. - Suitable for music education, recital performance, accompaniment, examinations, rehearsal, and recording applications. - Full concert-grade keyboard action providing precise touch and control. - Rich, balanced tonal character with clear treble response, defined midrange, and powerful bass performance. - Wide dynamic range suitable for solo, ensemble, and accompaniment performance. - High-quality soundboard, frame, and string assembly designed for professional musical applications. - Responsive action suitable for advanced pianists, students, and professional performers. - Durable construction designed for continuous use in educational and performance venues. - Finished in an elegant, professional-grade cabinet suitable for recital, studio, and public performance environments. - Supplied with a fitted protective cover for protection against dust, moisture, and general wear. - Supplied with a reinforced adjustable artist piano stool suitable for professional performance and teaching use. - Supplied with a heavy-duty support and storage frame suitable for safe handling and positioning of the instrument where required. - Suitable for use in performance spaces, recording studios, rehearsal rooms, examination centres, and music education facilities. - Supplied complete with all accessories, assembly, delivery, positioning, tuning, and commissioning necessary for operational use.
