This drawing is the property of Bright Ltd.
Copyright is reserved by them and the drawing is issued on the condition that it is not copied, reproduced, retained or disclosed to any unauthorised person, either wholly or in part without the consent in writing of Bright Ltd.

All proprietary goods and materials are to be fitted in accordance with manufacturers instructions and relevant Codes of Practice.
All work to comply with British Standards and relevant parts of "The Building Standards Regulations 1990" or equivalent national regulations.
Notwithstanding all of the above, all electrical work must comply with current I.E.E. regulations or equivalent.
The contractor will be held responsible for the structural integrity of all fittings and fixtures supplied.
Samples of all finishes must be provided by contractors for approval by Bright 3D Environments Ltd prior to construction.

Dimensions must be checked by contractors and setting out drawings based on site dimensions must be approved by Bright 3D Environments Ltd prior to construction. Any variations between stated dimensions and site dimensions should be reported to the designer prior to work being executed.

Notes

SET DRESSING NOTES

List of set dressing items, to be supplied by others but installed by fit out contractor:

- SD.1 hay fork, brush and spade
 - SD.2 Vintage pail / bucket
 - SD.3 Vintage wheel barrow
 - SD.4 horse shoe (fixed to wall)
 - SD.5 bridle (fixed to wall)
 - SD.6 Saddle and horse brasses on saddle stand
 - SD.7 Veterinary items
 - SD.8 Horse Feed bucket
- Fit out contractor to allow for any wall fixings noted. Set dressing items drawn indicatively, to be updated following procurement of antique/vintage items.

AV NOTES

An AV Specialist will be in attendance for the installation of AV hardware and will help advise on best locations for the equipment. They will also be responsible for configuring the equipment and loading of AV content onto the media players.

- 6no. characters total.
- Refer to character vector files for print / cutout outlines.
- Refer to graphic schedule: G3.1-G3.6
- allow for multiple coats of lacquer, to manufacturer's recommendations
- Each unit shall resist a horizontal load of 300 N at 1.5 m height without tipping. Base plinth to be weighted/ballasted accordingly.

The characters shall:

Withstand repeated physical interaction/moving

Resist pushing, leaning, and climbing forces

Be designed for long-term durability with minimal maintenance

dibond (or equivalent and approved) graphic panel (~2mm) bonded to valchromat (or eq and approved) substrate using appropriate, robust adhesive. Ensure flush trimmed edges.
 OUTLINE INDICATIVE ONLY.

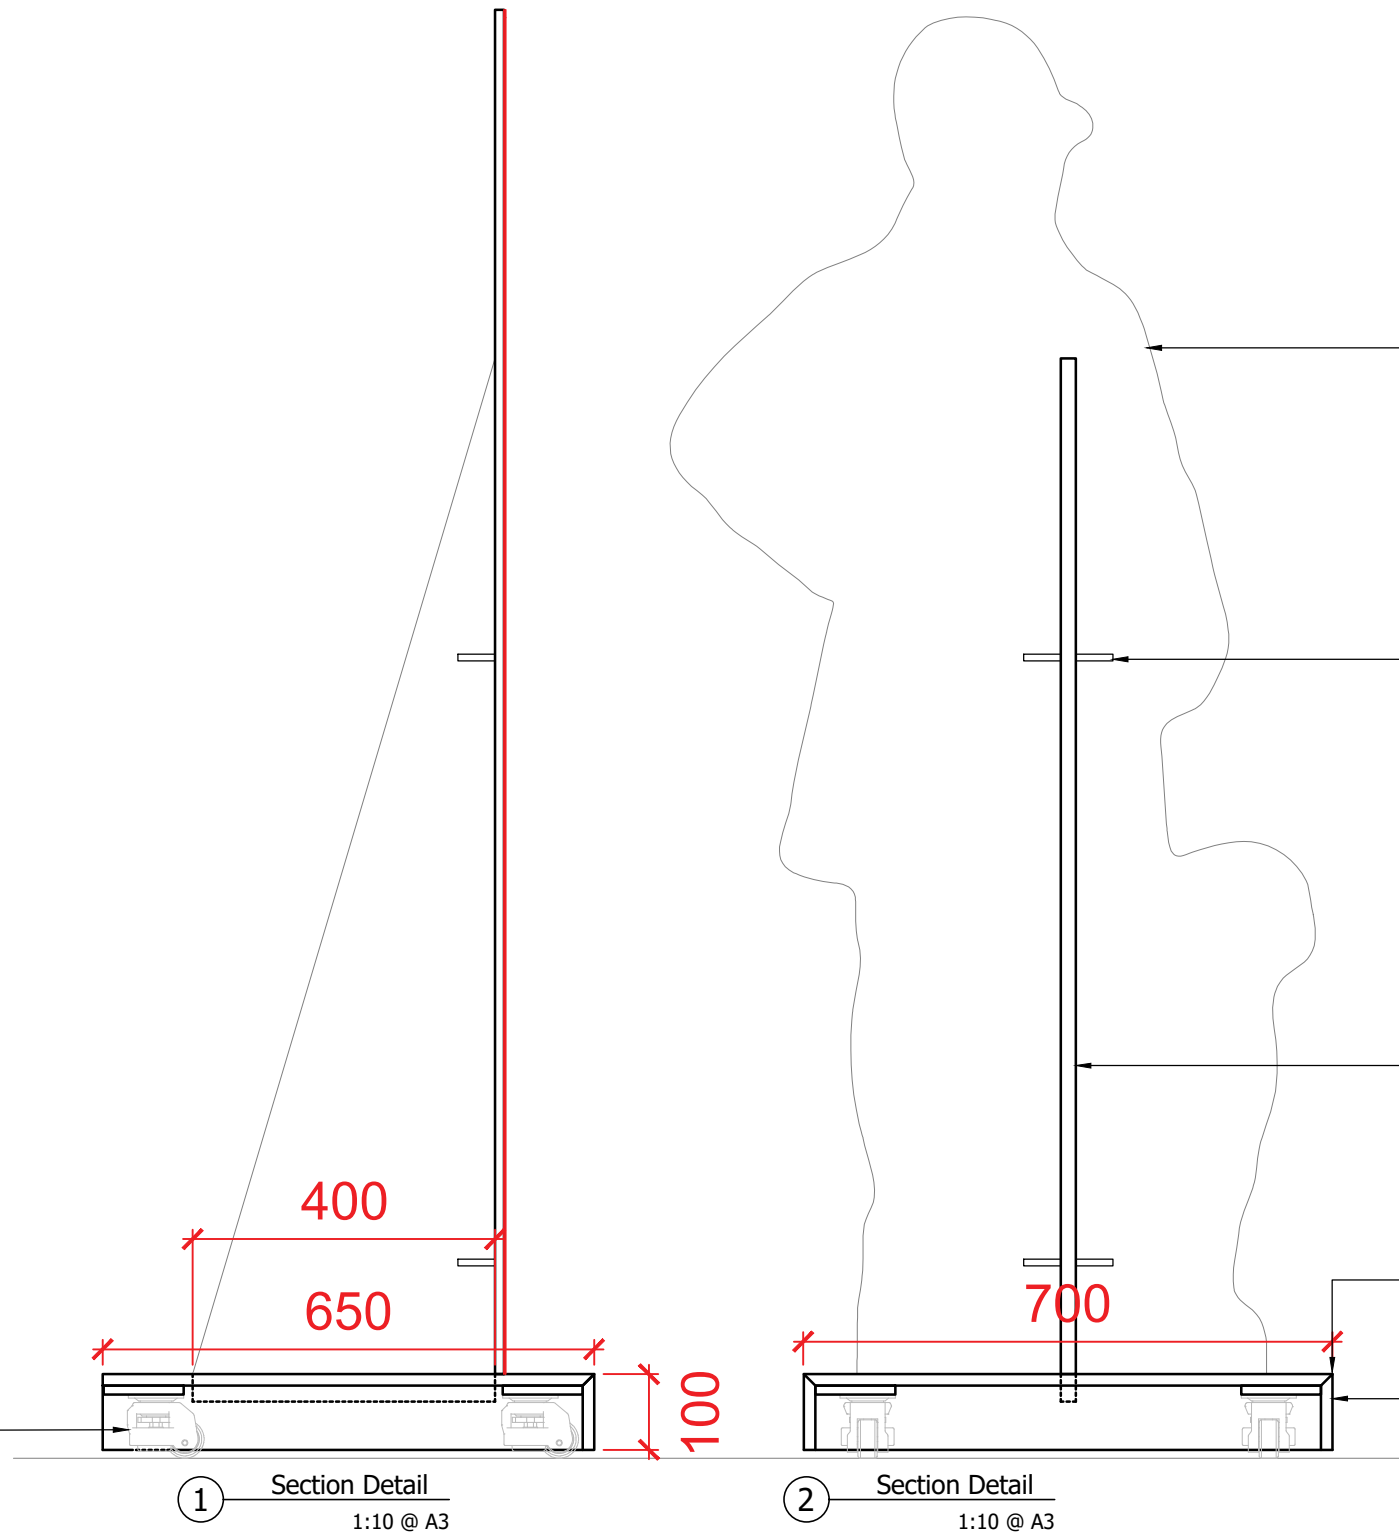

brackets to fix cutout character to rear stabilising fin. Exact number and location to be determined by FO contractor.

6-8mm black powdercoated metal fin mechanically fixed to base plinth and cutout character

Black valchromat (or equivalent and approved) with clear matt lacquer.
mitred corners and invisible/discreet fixing
(to be agreed with exhibition designer)

hollow plinth

levelling swivel castor, with appropriate weight load and retractable ratchet wrench operation. Black powdercoat finish. Stable and secure top plate fixing. Access to ratchet controls via back of plinth.
Installed with room to swivel 360 and for access to ratchet controls.

All proprietary goods and materials are to be fitted in accordance with manufacturers instructions and relevant Codes of Practice.

All work to comply with British Standards and relevant parts of "The Building Standards Regulations 1990" or equivalent national regulations.

Notwithstanding all of the above, all electrical work must comply with current I.E.E. regulations or equivalent.

The contractor will be held responsible for the structural integrity of all fittings and fixtures supplied.

Samples of all finishes must be provided by contractors for approval by Bright Spd Environments Ltd prior to construction.

Dimensions must be checked by contractors and setting out drawings based on site dimensions must be approved by Bright 3D Environments Ltd prior to construction. Any variations between stated dimensions and site dimensions should be reported to the designer prior to work being executed.

Description

Table S2.4

Scale	Date	Drawn/Checked
Noted @ A3	31.03.2026	EH

Project No.	Drawing No.	Revision
1904	401	A

This drawing is the property of Bright Ltd.
Copyright is reserved by them and the drawing is issued on the
condition that it is not copied, reproduced, retained or disclosed
to any unauthorised person, either wholly or in part without the
consent in writing of Bright Ltd.

- The blankets shall:
- Visually represent traditional stable blankets
 - Provide sufficient structure to maintain form when draped
 - Be securely fixed to railing structures
 - Include printed and embroidered graphic elements
 - Comply with fire safety requirements for public exhibition environments

All materials, fabrication methods, and installation shall be suitable for indoor public exhibition use.

example cable fixing method

Each blanket shall be fabricated using a multi-layer textile construction providing both visual realism and structural body.

2.1 Outer Fabric

Outer visible fabric shall be:

- Heavyweight linen
- Fabric weight: 200-400 gsm
- Suitable for embroidery and direct printing

2.2 Core Structure Layer

A concealed structural core shall be incorporated within the blanket to provide body and shape.

Core material shall be:

- Fire-retardant (FR) wool or felt
- Minimum thickness sufficient to maintain drape profile
- Uniform across blanket surface

Thickness shall be confirmed during sampling stage.

2.3 Edge Finish

All blankets shall include:

- Corded trim or piping detail
- Continuous finish around exposed edges
- Colour and size to match approved sample

Edges shall be neatly finished and resistant to fraying.

Contractor shall provide fabric samples for approval prior to manufacture.

The blankets shall be designed to hang over stable railings and be secured in place against theft while remaining fully removable by maintenance staff using standard hand tools.

Secure fixing method: a concealed stainless steel retention cable integrated into the top edge. The cable shall:

- Run through a reinforced top hem
- Wrap fully around the railing structure
- Be secured using a concealed mechanical fixing

Cable specification:

- Material: Stainless steel
- Diameter: 2-3 mm minimum
- Minimum breaking load: Suitable to resist manual pulling
- Cable termination method: Wire Rope Loop Clamp Grip operated by a standard hand tool (or equivalent and approved). To be robust and suitable for repeated installation cycles.

In addition, each blanket shall include positioning straps: 2 sewn internal straps positioned on the reverse side, wrapped securely around railing elements.

Strap material shall be durable woven textile webbing with hook-and-loop (Velcro), or approved equivalent

- Minimum width: 25 mm
- Colour matched or concealed where visible

The strap system shall allow repeated removal without degradation.

All proprietary goods and materials are to be fitted in accordance with manufacturers instructions and relevant Codes of Practice.
All work to comply with British Standards and relevant parts of "The Building Standards Regulations 1990" or equivalent national regulations.
Notwithstanding all of the above, all electrical work must comply with current I.E.E. regulations or equivalent.
The contractor will be held responsible for the structural integrity of all fittings and fixtures supplied.
Samples of all finishes must be provided by contractors for approval by Bright 3D Environments Ltd prior to construction.

Dimensions must be checked by contractors and setting out drawings based on site dimensions must be approved by Bright 3D Environments Ltd prior to construction. Any variations between stated dimensions and site dimensions should be reported to the designer prior to work being executed.
