Title: Volume 1 of 2; Request for Information

- 1.6.11 The client has appointed an authorised supplier, to manage and process all of the client's customs clearance requirements for goods being supplied to the client from outside of the European Union. This supplier must be used and the Contractor will be given instructions on how this account will be managed if needed. No other supplier will be accepted by the client in relation to customs clearance requirements.

Part 2: Introduction to the Contracting Authority

The Contracting Authority, daa plc, formerly Dublin Airport Authority and formerly Aer Rianta, is a major international airport company employing over 3,000 people. The Contracting Authority's principal activities are airport development, operation, and management, Irish and international airport retail management and international airport investment. A copy of the Annual Report and Financial Statements of the Contracting Authority is available on the Internet (www.daa.ie).

Part 3: Requirements

The Contracting Authority intends to establish a single-party framework agreement with an experienced and proven LoRaWAN (Long Range Wide Area Network) service provider for the supply, delivery, commissioning, integration, and ongoing support of LoRaWAN devices and associated network infrastructure for daa. Installation will be carried out by daa appointed contractors. The framework will be established for an initial three-year term, with the option to extend for a further three years, subject to performance and organisational requirements.

daa requires a scalable, standards-based LoRaWAN solution capable of supporting future expansion across multiple operational environments. The proposed solution must support open LoRaWAN protocols, multi-vendor device compatibility, and long-term operational flexibility.

The successful supplier will be responsible for providing and supporting the following core components:

- LoRaWAN-enabled sensing devices for monitoring energy consumption, asset condition, environmental parameters, passenger flow analytics, and other operational metrics.
- LoRaWAN gateways required to provide network coverage across daa facilities.
- A LoRaWAN Network Server and device management platform to manage device connectivity and network operations.

The Network Server and device management platform must provide capabilities including:

- Secure device onboarding and provisioning
- Centralised configuration and lifecycle management of end devices
- Network monitoring and diagnostics
- Firmware management and device status monitoring
- Secure and reliable data transport from field devices to upstream systems

The platform must provide daa with secure administrative access to device credentials and network keys for all deployed devices in order to support operational control, device redeployment, and future network flexibility to avoid vendor lock-in.

The LoRaWAN solution must integrate with daa's existing operational technology platforms. In particular, all device telemetry data must be capable of being securely forwarded to the organisation's Ignition platform and energy platform (Cylon Active energy), which serves as daa's centralised system for energy and asset data across terminals and wider facilities.

Ignition and other operational systems (including Cylon and other building management platforms) are existing systems and are outside the scope of this tender. The supplier's solution must therefore support standard integration mechanisms (e.g. HTTPS APIs, or equivalent) to enable seamless ingestion of device data into these platforms.

Typical use cases expected under this framework may include, but are not limited to:

- Monitoring of escalators, travelators, motors, incoming electrical mains, and other building assets currently lacking smart or connected capabilities

Project: P20624 Design Supply, Delivery, Commission, Integration, Maintenance and Support of LoRaWAN devices and Server Infrastructure for daa.

Title: Volume 1 of 2; Request for Information

- Energy usage monitoring and condition monitoring of electrical and mechanical plant
- Environmental monitoring, including temperature and indoor air quality
- Passenger flow analytics and occupancy measurement
- Remote monitoring or control of heating circuits and other building systems
- Smart washroom solutions

The proposed solution should prioritise non-intrusive, easy-to-install sensing technologies suitable for deployment within operational airport environments.

Following completion of the procurement process, a single supplier will be appointed to the Framework Agreement. The appointed supplier will be responsible for the provision of the goods, services and associated support requirements within the scope of the Framework for the duration of the agreement. No guarantee is given as to the volume, value or frequency of any requirements that may be placed under the Framework.

The Contracting Authority reserves the right to procure under this Framework any goods, services, software, hardware or ancillary works reasonably related to, compatible with, or supportive of the LoRaWAN/IoT infrastructure and associated monitoring, data acquisition, asset management, energy management and smart campus requirements described within this procurement during the term of the Framework.

It is anticipated that at least three companies will be invited to progress to the RFT stage.

Part 4: Evaluation Process

- 4.1 The RFI evaluation will focus on the capacity of the Applicant, in the opinion of the Contracting Authority, to perform the Contract. Further detail of the criteria by which this will be assessed is set out in Section 7 below.
- 4.2 The RFI process will not involve Applicant presentations. Evaluation will depend upon the submissions only.
- 4.3 The Evaluation Team responsible for assessing all bids across every element of this RFI will consist of the following daa personnel:

Robert Smyth	Technical
Vicki Brady	Technical
Sean Campbell	Technical
Paris Moore	IT Technical
Carmel Dunne or Sean Meade	Financial
Richard Nash	Quality

Part 5: Submissions by Groups

- 5.1 Applications may be submitted by single entities or by groups. The Contracting Authority acknowledges that, in order to offer the resources and range and depth of skills required, entities may wish to form a consortium that will apply to prequalify. Applicants are required, in the RFI Questionnaire, to identify a Lead Applicant, meaning the entity whom it is proposed will enter into the contract with the Contracting Authority, if the Applicant is successful. Where an Applicant is applying as a group, the Lead Applicant is the group member who will enter into the contract with the Contracting Authority.
- 5.2 Some of the questions in the RFI Questionnaire are to be answered by the Lead Applicant on behalf of the Applicant as a whole, while others are to be answered by the Lead Applicant in respect of their own operations only. The RFI Questionnaire identifies the entity(ies) who should answer each question.
- 5.3 Where the successful Applicant is a group/consortium, it is currently anticipated that the Lead Applicant will be required to be liable for the full performance of the services (with other members of the Applicant group, acting as sub-Contractors, entering into collateral warranties with the Contracting Authority if required by the Contracting Authority), although the Contracting Authority reserves the right to require the

Title: Volume 1 of 2; Request for Information

group/consortium to contract on any other basis the Contracting Authority considers appropriate, including on the basis of joint and several liability.

Part 6: Reliance on Resources

- 6.1 Where, in order to prove its financial and technical standing (including, for the avoidance of doubt, in relation to turnover), an Applicant, or any member of a group, relies on the resources/capacities of entities with which it is directly or indirectly linked, (including, for example, but not limited to, reliance on a parent company's resources/capacities) it must establish to the Contracting Authority's satisfaction that it will have available to it the resources/capacities of those entities or undertakings which are necessary for the performance of the Contract (for example by way of a letter from such entity to the Contracting Authority confirming that it will make such resources/capacities available if the Applicant is successful and that it will provide contractual confirmations satisfactory to the Contracting Authority if required to do so).
- 6.2 It is anticipated that Contracting Authority will require entities who offer resources or support to Applicants to contract on a joint and several basis, provide guarantees, collateral warranties, direct agreements or some other structure or contractual mechanism as the Contracting Authority considers necessary in order for it to have appropriate recourse to resources being relied on.
- 6.3 Where any Applicant is relying on the resources of another undertaking then, in addition to its response to Part A7 of the Questionnaire, the information required in any of the Questions in Part C and/or Part D of the RFI Questionnaire must be provided both in respect of the Applicant and in respect of the undertaking whose resources are being relied upon by the relevant Applicant. (For example, if a parent company is being relied upon for the purposes of meeting a financial robustness test, its accounts as well as those of the Applicant must be provided).
- 6.4 The Contracting Authority intends to evaluate the Applicant:
- a) in respect of financial standing, based on the financial standing of the undertaking whose resources are being relied upon; and
 - b) in respect of technical standing, based on the technical standing of the undertaking whose resources are being relied upon and on the basis of the Applicant's own technical standing as appropriate.
- 6.5 In the event that the Contracting Authority deems that the evidence provided in respect of reliance on resources is insufficient (or where no reliance on resources is sought), the Applicant will be evaluated based on its own financial and technical standing.

7.2 RFI stage

- 7.2.1 Responses to the RFI Questionnaire returned by Applicants will be assessed in accordance with the Eligibility Requirements set out in Section 7.5 (Eligibility Requirements) and the Minimum Requirements set out in Section 7.6 (Minimum Requirements).
- 7.2.2 Applicants that satisfy the Eligibility Requirements and the Minimum Requirements will have their responses to the RFI Questionnaire evaluated in accordance with the Assessment Criteria set out in Section 7.7 (Assessment Criteria) and will receive a ranking.
- 7.2.3 Applicants who do not pre-qualify or are not shortlisted will be notified in writing by the Contracting Authority.

7.3 Process for Shortlisting

- 7.3.1 In order to be considered for shortlisting, Applicants should note that they:

The Contracting Authority reserves the right to carry out all three steps in parallel at its convenience, but Applicants eliminated for failing to meet steps one and two will not be eligible for shortlisting. The remaining Applicants will be ranked in descending order based on the marks obtained for the Assessment Criteria under Section 7.7. Appropriately qualified Applicants will be progressed to the foregoing procedure.

7.4 Tie Break

or the Contracting Authority is aware that the Applicant is in breach of its obligations relating to the payment of taxes or social security contributions and this breach has been established by a final, binding judicial or administrative decision.

Applicants requiring further details in relation to the above may contact the Contracting Authority.

- b) The Applicant (or any member of the Applicant, in the case of a group):
- i. has failed to comply with applicable obligations in the fields of environmental, social and labour law within Article 36 (2) of the EU Utilities Directive (Directive 2014/25/EU) and European Union (Award of Contracts by Utility Undertakings) Regulations 2016 (S.I. No. 286/2016); or
 - ii. is bankrupt or is the subject of insolvency or winding-up proceedings, its assets are being administered by a liquidator or by the court, it has entered into an arrangement with creditors, its business activities are suspended or it is in any analogous situation arising from a similar procedure under national laws and regulations; or
 - iii. the Contracting Authority can demonstrate, by any appropriate means, has been guilty of grave professional misconduct, which renders its integrity questionable; or
 - iv. has entered into agreements with other economic operators aimed at distorting competition, for which the Contracting Authority has sufficiently plausible indications; or
 - v. has a conflict of interest within the meaning of Article 42 of the Utilities Directive 2014/25/EU and Regulation 41 of the European Union (Award of Contracts by Utility Undertakings) Regulations 2016 (S.I. No. 286 of 2016), that cannot be effectively remedied by other, less intrusive, measures; or

Each Applicant must submit a statement to the Contracting Authority advising whether or not any of the circumstances listed above apply (see Part B of the RFI Questionnaire). Entities being relied upon and proposed subcontractors must also complete this declaration. In the event that the entity/subcontractor cannot be replaced with another entity/subcontractor to whom the grounds do not apply (including where the Contracting Authority concludes that to permit such replacement would be contrary to law), the Contracting Authority reserves the right to eliminate the Applicant from the Competition.

Title: Volume 1 of 2; Request for Information

Any Applicant, member of an Applicant, entity being relied upon or subcontractor which is in one of the situations referred to above is invited to provide details of any factors or circumstances which it believes are relevant to the Contracting Authority's assessment of these grounds for exclusion. For example, where an Applicant is in one of the situations referred to above but has taken measures which it believes are sufficient to demonstrate its reliability, such Applicant may provide evidence of such measures to the Contracting Authority for consideration. Applicants should note that, with regard to the situations listed in a) above, the circumstances which the Contracting Authority may take into account before deciding whether or not to exclude an Applicant are prescribed by law, and Applicants are directed to Article 80 of the Utilities Directive 2014/24/EU as transposed into Irish Law, Regulation 80 of S.I. No. 286/2016 (Award of Contracts by Utility Undertakings) Regulations 2016 in this regard.

7.6 Minimum Requirements (Step Two)

7.6.1 Financial Robustness and Turnover

- 7.6.1.1 The Applicant must be, in the Contracting Authority's opinion, financially robust. The financial robustness of the Applicant will be evaluated on the basis of the Lead Applicant's financial robustness (assessed on their overall financial position at each of its last three financial year ends) based on a review of the financial and other information identified in the table at 7.6.1.3 below and required in accordance with the RFI Questionnaire. In respect of the financial statements, the Contracting Authority's review will include the profit and loss account, the balance sheet and cashflow statement.

In order to pass the financial robustness assessment an Applicant will be required to demonstrate profitability and cash generation, in the opinion of Contracting Authority, sufficient to service their debt obligations (if any) and other liabilities and to generate sufficient working capital to undertake the services required for the Contract and meet any liabilities which may arise under the Contract.

Where the Contracting Authority considers, based on its objective assessment of the information provided referred to in the table below, that an Applicant has not, on balance, demonstrated that it is financially robust, the Contracting Authority shall exclude the Applicant from further consideration in this process.

- 7.6.1.2 Where, for any valid reason, the Applicant is unable to provide the information requested in the RFI Questionnaire, it may prove its financial robustness by any other document which the Contracting Authority considers appropriate.

- 7.6.1.3 The following table provides the relevant RFI Questionnaire references with regard to financial robustness.
