

Clarifications with regard to: Request for Tenders for the Provision of Thin Clients

Clarifications 1: 17 th September 2026		
#	Question	Answer
1.	We can supply an evaluation unit with a Linux operating system, can the device be re-imaged by the Revenue Commissioner to eLux 7 for the verification trial.	If the provided device is on Unicons Hardware Compatibility List (HCL), we should be able to re-image with our version of eLux7 and use it for verification testing.
2.	The 'Technical and Professional Ability' section of the tender response document says that "Tenderers must declare by completing Appendix 4 that they satisfy the technical and professional requirement(s) set out below and that they are able, upon request and without delay, to provide the supporting documentation specified below to the Contracting Authority in each case." Does this mean that Previous Experience contract information should <u>not</u> be entered in the tender response document and that previous contract information will be requested by the Contracting Authority at a later stage of the competition?	Tenderers must complete the Previous Experience section contained in the tender response document.
3.	With regards to the sample device, would it be okay to ship the device without an image but that you can download to the device, due to the time constraints	If no pre-installed image is on the provided device but the device is on Unicons Hardware Compatibility List (HCL), we should be able to image with our version of eLux7 via USB and use it for verification testing.
