

# Project Summary

*Supply and Installation of Permanent Programmable LED Street Lighting – Main Street & Barrack Street, Belmullet, Co. Mayo*

## 1. Promoter Details

Promoter: Erris Chamber of Commerce

Address: Chapel Street, Belmullet, Co. Mayo, F26 V2A8, Ireland

Contact: Brian Bakeberg, President, Erris Chamber of Commerce

Phone: 087 700 2629

Email (tender queries and submissions): [procurements@errischamber.ie](mailto:procurements@errischamber.ie)

## 2. Background

Belmullet town centre has, for a number of years, used temporary seasonal (Christmas) lighting on Main Street and Barrack Street. This lighting is costly to erect and remove each year, uses conventional bulbs operating for long hours through November and December, and is only available for a short period each year.

This project will replace that temporary arrangement with a permanent, programmable LED lighting system, cutting electricity consumption by an estimated 85% compared with the existing bulbs, while providing an attractive lighting feature that can be used throughout the year – supporting footfall, atmosphere and evening trade in the town centre.

## 3. Funding

The project is being applied for under Ireland's LEADER Programme 2023–2027, through Mayo North East LEADER Partnership CLG (Implementing Partner). The estimated project cost and funding structure, consistent with the value entered for this competition on eTenders, is:

- Total estimated project cost: €70,000 (100%)
- LEADER grant: €52,500 (75%)
- Promoter's own resources: €17,500 (25%)

*These are estimated figures for the purposes of this tender competition. The Grant Application Form submitted to Mayo North East LEADER Partnership will be updated to match once a tender is accepted and the final contract value is known.*

## 4. Procurement Route

As the level of public (LEADER) funding for this project is 75% of eligible costs, the project is being procured by Open Procedure competitive tender via the eTenders portal, in accordance with the National Public Procurement Guidelines and the LEADER Procurement Guidelines. Prospective tenderers must register on eTenders and submit a formal tender in response to this Request for Tenders (RFT).

## **5. Scope of Works (Summary)**

Supply, delivery and installation of a permanent catenary/steel wire support system and permanent, programmable LED “festoon-style” street lighting along Main Street and Barrack Street, Belmullet, including the control/programming system, associated electrical works, and two road crossings, as more fully described in the Technical Specification.

## **6. RFT Documents Issued**

1. Instruction to Tenderers (ITT-W4) and Particulars, including Appendix 1 (Schedule of Rates or Bill of Quantities – Not Applicable) and Appendix 2 (Additional Information to be Submitted with Tender – insurance evidence)
2. This Project Summary
3. Technical Specification
4. Form of Tender and Schedule (FTS6)
5. Short Public Works Contract conditions (PW-CF6)
6. Works Declaration (LEADER) (WDL)

## **7. Key Dates**

- Latest date for queries: 24-09-2026
- Date after which the Employer will not normally issue further supplemental information: 30-09-2026
- Latest date and time for submission of Tenders: 08-10-2026, 12:00 noon

Tenders must be submitted by email only, as a single PDF document, to [procurements@errischamber.ie](mailto:procurements@errischamber.ie).

## **8. Basis of Award**

The Contract will be awarded on the basis of Lowest Price (Fixed Price Lump Sum), to the tenderer submitting the lowest compliant tender that satisfies the suitability criteria in the Works Declaration (LEADER) and the insurance requirements set out in the Technical Specification and the Instruction to Tenderers.
