### Question JLEL (06/10/2026)

Good afternoon,

Would DCC consider allowing a suitably qualified and experienced civil-structural engineer to undertake the Design Team Lead role?

Given the nature of the proposed works, we consider it would be appropriate for an engineer with relevant experience of managing and coordinating comparable multidisciplinary marine / riverine projects to act as Design Team Lead, while the Project Architect continues to provide the required architectural services.

Kind regards,

Tender Team

### Answer DCC

On 12/10/2026

No. Dublin City Council is seeking an Architect-Led Design Team to deliver the project.
