Title: Design and Delivery of 30 credit, level 9 microcredential - Applied Artificial Intelligence for Supply Chain Management

Description: Artificial Intelligence (AI) is revolutionizing logistics and supply chain management by enhancing efficiency, accuracy, and decision-making. AI-driven systems can predict demand, optimize routes, and manage inventory in real-time, reducing costs and improving service levels. Machine learning algorithms analyse vast amounts of data to identify patterns and trends, enabling proactive responses to disruptions. Additionally, AI-powered automation streamlines operations, from warehouse management to transportation, minimizing human error and increasing productivity. As the logistics and supply chain industry evolves, AI's role will become increasingly critical in driving innovation, sustainability, and competitive advantage. On behalf of network members CILT Mobility and Supply Chain Skillnet is seeking providers for the development and delivery of an NFQ aligned level 9, 30 credit microcredential in Applied Artificial Intelligence for Supply Chain Management.
