Provision of Services for Electrical Maintenance Repair and Callout to 3 Landfill Sites and Leachate Infrastructure Maintenance in County Louth

Contract or concession notice – standard regime

1 Buyer

1.1 Buyer

Official name: Louth County Council_381

Legal type of the buyer: Local authority

Activity of the contracting authority: General public services

2 Procedure

2.1 Procedure

Title: Provision of Services for Electrical Maintenance Repair and Callout to 3 Landfill Sites and Leachate Infrastructure Maintenance in County Louth

Description: Louth County Council has three closed landfills which are under licence by the EPA. At site Number 1-Whiteriver landfill, there are seven side slope risers each with a leachate submersible pump and level sensor. The depth of these pumps varies from between 30 and 80 metres. The Council as part of licence conditions are required to maintain a level below 1 metre in depth in each side slope riser sump. The lagoon level is required to be below 1.90 metres. All side slope risers and lagoons are linked by level sensors, programmable logic controllers and underground wiring to a scada system. The site is supplied by single and three phase supply. At this site there are several buildings including a weighbridge, internal and external WC, office, store, canteen, engine compound WC, engine compound switch room and engine compound store/office. Each building has lighting circuits and power outlet sockets (note no power outlet sockets in WC's). In addition, there are several external lighting circuits, hot water boilers, fixed heaters and groundwater pumps. There are seven external control panels associated with the side slope risers and a number of external control panels associated with the aeration unit, surface water lagoon, generator switch over point, electrical kiosks. There are also several internal control panels in the office, weighbridge and engine compound rooms. At site Number 2- Drogheda landfill, there are two sumps used for pumping sewage and surface water. Both have a duty and standby pumps and associated control panels. At the flare compound there are electrical sockets and electrical panel which operates an air compressor. At site Number 3-Dundalk landfill there is one sump with a duty and standby pump plus associated control panel which pumps to the sewer. All sites will require one full electrical test during the duration of the contract and testing of RCBO's every six months. Ropes and chains are tested every six months. The contract may require the isolation of pumps and the lifting of pumps at Drogheda and Dundalk every six months to facilitate testing and may require chain replacement.

Procedure identifier: 4b92b41d-e666-4927-8d5c-99206b7eac0e

Type of procedure: Open

The procedure is accelerated: no

2.1.1 Purpose

Main nature of the contract: Services

Main classification (cpv): 90531000 Landfill management services

Additional classification (cpv): 51100000 Installation services of electrical and mechanical equipment

Additional classification (cpv): 51110000 Installation services of electrical equipment

Additional classification (cpv): 51120000 Installation services of mechanical equipment

Additional classification (cpv): 51200000 Installation services of equipment for measuring, checking, testing and navigating

Additional classification (cpv): 51300000 Installation services of communications equipment

Additional classification (cpv): 51500000 Installation services of machinery and equipment

2.1.2 Place of performance

Country subdivision (NUTS): Mid-East (IE062)

Country: Ireland

2.1.3 Value

Estimated value excluding VAT: 175 000 Euro

Maximum value of the framework agreement: 175 000 Euro

2.1.4 General information

Legal basis:

Directive 2014/24/EU

2.1.6 Grounds for exclusion

Sources of grounds for exclusion: Procurement Document

5 Lot

5.1 Lot technical ID: LOT-0001
