Title: Supply and install of solar panels - Man O War
Description: Man O'War GFC is inviting tenders for the installation of a solar photovoltaic (PV) and battery energy storage system at the Man O'War GFC facility. The project forms part of the club's wider objective to improve energy efficiency, reduce operating costs, and transition towards a more sustainable and environmentally responsible energy model. The club currently relies in part on a diesel generator to support its energy needs, particularly for pitch lighting, and this project seeks to replace that system with a modern, renewable solution. The proposed system will generate clean electricity on-site and provide stored energy for evening and peak-time use, ensuring a reliable and efficient power supply to support the club's activities. Through this investment, Man O'War GFC aims to significantly reduce its carbon footprint while enhancing long-term energy resilience and operational sustainability.
