5.1.7 Strategic procurement

Aim of strategic procurement: Innovative purchase

Description: This procurement procedure has been intentionally designed to look beyond initial purchase costs, prioritizing sustainable lifecycle management, social responsibility, and engineering innovation. Energy Efficiency: The technical specifications mandate the inclusion of high-efficiency, premium-grade IE3/IE4 motors and intelligent automatic idle/standby modes. This minimises electricity consumption during operational downtime. Water & Chemical Reduction: The tender prioritizes an "hygienic-by-design" structure (open stainless steel framing with toolless disassembly). This reduces the volume of water, strict chemical detergents, and time required for daily sanitation washdowns. Resource Optimization & Waste Reduction: Advanced portion-control technology ensures exact slice weights. This drastically minimizes end-of-loin product waste and product giveaway, directly mitigating food waste at the source. Ergonomics & Workforce Safety: The specifications mandate advanced physical and electronic safety interlocking guards alongside mechanical lift-assist or low-loading heights. This significantly reduces the risk of repetitive strain injuries (RSIs) and acute workplace accidents for operators.
