Title: Tender for the Provision of an HTML5 Interactive Content Authoring and Delivery Solution for MTU
Description: The University requires an intuitive, accessible and flexible HTML5 authoring solution that enables academic staff to create, deliver, share and reuse a range of engaging, interactive and multimedia-rich learning activities with minimal technical expertise. The solution must integrate seamlessly with the University's existing Canvas LMS environments through LTI 1.3, supporting assessment, automated feedback, gradebook integration and learner analytics, while remaining compatible with future learning platforms. It must support the creation of responsive, accessible learning content aligned with WCAG 2.2 AA standards and promote active learning through interactive and feedback-driven experiences. The University also requires robust content portability, including the ability to import, export and retain editable learning resources, alongside a clearly defined approach to migrating existing H5P content with minimal disruption. The solution must be supported by reliable technical assistance, comprehensive staff resources, effective institutional administration and governance controls, and a demonstrable commitment to ongoing product development, interoperability and long-term sustainability. Full details are in the tender document attached to this Contract Notice.
