Title: Award: Access to a service providing Long Term Power Price Forecasts
Description: The CRU requires access to a service that provides long term power price forecasts and analysis for SEM, Great Britain and France. Such information includes but is not limited to: i. Independent long term forward power price forecasts for SEM, Great Britain and France through to 2050, under various scenarios and to be provided (at a minimum) on a quarterly basis. The power prices are to be provided on a technology specific basis (e.g. including but not limited to onshore wind, offshore wind, solar, time-weighted); and ii. Access to the provider's independent previous historic forecast prices for SEM, Great Britian and France. The services required comprise the provision, installation, configuration, and support of any potential platforms, if required. The successful tenderer will be required to fully install the system, carry out testing, training and support and maintenance, and implement any further enhancements, thereafter, if required. The CRU may, on occasion, conduct a comparative analysis between its internal model outputs and the data provided by the data service. While the CRU will not publish any raw data belonging to the service provider, the CRU may publish commentary to inform stakeholders that CRU's model outputs have been compared to an independent external forecast.
